## प्राककथन

भव्य विविध संस्कृति और ऐतिहासिक विरासत से सम्पन्न भारत जैसे किसी देश में घरेलू पर्यटन की आर्थिक और सामाजिक महत्ता के विषय में और विस्तार से बताने की आवश्यकता नहीं है। राष्ट्रीय प्रतिदर्श सर्वेक्षण कार्यालय (एनएसएसओ) के घरेलू पर्यटन संबंधी व्यय पर किये गए सर्वेक्षण देश के घरेलू पर्यटन के परिवृश्य के विभिन्न संकेतकों से संबंधित आंकड़ों के प्राथमिक स्रोत हैं। यह सर्वेक्षण घरेलू पर्यटन की मात्रा, घरेलू पर्यटन से संबंधित कार्यकलापों के संचालन से जुड़े परिवारों की संख्या, रात्रिपर्यट की और उसी दिन वाली यात्राओं की संख्या, औसत पर्यटन व्यय इत्यादि जैसे संकेतकों के अनुमान देता है। इस सर्वेक्षण के परिणाम/आंकड़े योजना बनाने, नीति-निर्माण और निर्णय लेने में सहायता हेतु तथा विभिन्न सरकारी संगठनों, शिक्षाविदों, शोधकर्ताओं तथा विद्वानों द्वारा आगे विश्लेषणात्मक अध्ययनों हेतु इनपुट के रूप में उपयोगी हैं।

2. राष्ट्रीय प्रतिदर्श सर्वेक्षण कार्यालय (एनएसएसओ) ने अपने 72वें दौर (जुलाई 2014 – जून 2015) के सर्वेक्षण के भाग के रूप में 'घरेलू पर्यटन व्यय' संबंधी एक राष्ट्रव्यापी सर्वेक्षण आयोजित किया। समान विषय पर विगत सर्वेक्षण एनएसएस के 65वें दौर (जुलाई 2008 – जून 2009) के दौरान आयोजित किया गया था। सभी राज्य सरकारों तथा संघ राज्य क्षेत्रों (अण्डमान एवं निकोबार द्वीप समूह, चंडीगढ़, दादरा व नागर हवेली तथा लक्षद्वीप को छोड़कर) ने भी कम से कम समान मैचिंग प्रतिदर्श आकार के आधार पर सर्वेक्षण कार्यक्रम में भाग लिया।

3. एनएसएसओ का निरंतर यह प्रयास रहा है कि सर्वेक्षण के परिणाम क्षेत्र कार्य के समापन के एक वर्ष के भीतर मुख्य संकेतकों के रूप जारी किए जाएं ताकि प्रयोगकर्ताओं की आवश्यकताओं की समय रहते पूर्ति की जा सके। इस उद्देश्य को ध्यान में रखते हुए और सर्वेक्षण के मुख्य परिणामों को इसकी विस्तृत रिपोर्ट को जारी करने से पूर्व उपलब्ध कराने हेतु एनएसएसओ द्वारा केंद्रीय प्रतिदर्श आंकड़ों पर आधारित दस्तावेज 'भारत में घरेलू पर्यटन के मुख्य संकेतक' का प्रकाशन किया गया तथा इकाई स्तरीय आंकड़े भी जून 2016 में जारी किए गए। इसके अलावा, सर्वेक्षण के आधार पर एक विस्तृत रिपोर्ट जारी करना प्रस्तावित किया गया। वर्तमान रिपोर्ट 'भारत में घरेलू पर्यटन' अधिक विस्तृत रूप में सर्वेक्षण निष्कर्ष प्रस्तुत करती है।

4. सर्वेक्षण अभिकल्प तथा अनुसंधान प्रभाग (एसडीआरडी) ने सर्वेक्षण-साधन विकसित करने तथा इस रिपोर्ट को तैयार करने का कार्य किया। क्षेत्र संकार्य प्रभाग (एफओडी) द्वारा सर्वेक्षण का क्षेत्र कार्य किया गया तथा आंकड़ा विधायन तथा सारणीयन कार्य समंक विधायन प्रभाग (डीपीडी) द्वारा किया गया था। समन्वय एवं प्रकाशन प्रभाग (सीपीडी) ने सर्वेक्षण संबंधी विभिन्न कार्यकलापों में समन्वयन का कार्य किया।

5. मैं सर्वेक्षण के विभिन्न चरणों में बहुमूल्य मार्गदर्शन प्रदान करने हेतु राष्ट्रीय प्रतिदर्श सर्वेक्षण के 72वें दौर के कार्य दल एवं राष्ट्रीय सांख्यिकी आयोग (एनएससी) के अध्यक्ष और सदस्यों का अत्यंत आभारी हूँ। मैं इस दस्तावेज को तैयार करने में शामिल एनएसएसओ के विभिन्न प्रभागों के अधिकारियों द्वारा किये गये प्रयासों की भी सराहना करता हूँ।

6. मैं आशा करता हूँ कि यह दस्तावेज योजनाकारों, नीति-निर्माताओं, शिक्षाविदों और शोधकर्ताओं के लिए उपयोगी सिद्ध होगी। इस दस्तावेज की विषयवस्तु, अभिन्यास और दस्तावेज के किसी अन्य पहलू में सुधार के लिये सुझावों का स्वागत है।

## Preface

The economic and social importance of domestic tourism in a country like India, endowed with splendid diversified culture and historical heritage, needs no further emphasis. The survey on Domestic Tourism Expenditure conducted by the National Sample Survey (NSS), are the primary sources of data on various indicators on domestic tourism scenario of the country. The survey provides estimates relating to indicators, like volume of domestic tourism, number of households undertaking domestic tourism activity, number of overnight trips and same day trips, average tourism expenditure etc. The results/data as per this survey are useful for planning, policy formulation and decision support and as input for further analytical studies relating to tourism by various Government organizations, academicians, researchers and scholars.

2. National Sample Survey Office (NSSO) conducted a nation-wide survey on 'Domestic Tourism Expenditure' as part of its 72<sup>nd</sup> round (July 2014-June 2015) survey. The previous survey on similar subject was conducted during the NSS 65<sup>th</sup> round (July 2008-June 2009). All the State Governments and Union Territories (except Andaman & Nicobar Islands, Chandigarh, Dadra & Nagar Haveli and Lakshadweep) also participated in the survey programme with at least equal matching sample size basis.

3. It has been the persistent endeavour of NSSO to bring out Key Indicators based on its survey within one year of completion of field work of the survey to meet the requirements of its users. With this aim in mind, NSSO brought out 'Key Indicators of Domestic Tourism in India' based on Central sample data and also released unit level data of the survey was released in June, 2016. Apart from this, based on the survey one detailed report was planned to be released on various aspects of domestic tourism. The present report entitled "Domestic Tourism in India" presents the survey findings in more detail.

4. Survey Design and Research Division (SDRD) undertook the development of survey instruments and the preparation of this document. Field work of the survey was carried out by the Field Operations Division (FOD) and the data processing and tabulation work was done by the Data Processing Division (DPD). Coordination and Publication Division (CPD) coordinated various activities pertaining to the survey.

5. I am highly thankful to the Chairman and Members of the Working Group for NSS 72<sup>nd</sup> round and National Statistical Commission (NSC) for providing their valuable guidance at various stages of the survey. I would also like to appreciate efforts made by the officers of the different Divisions of NSSO involved in preparation of this document.

6. I hope this report will be useful to planners, policy makers, academicians and researchers. Suggestions for improvement in content, layout and other aspects of this document will be highly appreciated.

June, 2017

# मुख्य बातें

एन.एस.एस. के 72वेंदौर (जूलाई 2014 - जून 2015) में 'घरेलू पर्यटन व्यय' पर एक सर्वेक्षण किया गया था। इसमें देशभर में 8001 ग्रामों से 79497 ग्रामीण परिवारों एवं 6061 खण्डों से 60191 नगरीय परिवारों का एक प्रतिदर्श सर्वेक्षित किया गया।

इस सर्वेक्षण के निष्कर्षों की मुख्य बातें निम्नलिखित हैं--

## I. परिवारिक रूपरेखा

- अखिल भारतीय स्तर पर औसत परिवार आकार 4.4 था जिसमें ग्रामीण क्षेत्रों का 4.59 एवं नगरीय क्षेत्रों का 4.01 था।

[कथन 3.1 ए]

- करीब 36.6% ग्रामीण परिवारों एवं 35.7% नगरीय परिवारों ने मुख्य उद्देश्यों के साथ रात्रिकालीन विहारों जिसमें फुर्सत एवं मनोविनोद, छुट्टी बिताना, स्वास्थ्य एवं चिकित्सा एवं खरीददारी पिछले 365 दिनों के दौरान और/या मुख्य उद्देश्यों व्यवसाय, सामाजिक, तीर्थाटन एवं धार्मिक क्रियाकलापों, शिक्षा एवं प्रशिक्षण एवं अन्य, पिछले 30 दिनों में दर्ज करवाया।
- पिछले 365 दिनों के दौरान रात्रिकालीन विहार, जिनका मुख्य उद्देश्य छुट्टी बिताना, फुर्सत एवं मनोविनोद, स्वास्थ्य एवं चिकित्सा एवं खरीदारी था, की औसतन संख्याप्रति 100 परिवार 22.2 थी (22.1 ग्रामीण के लिए एवं 22.4 नगरीय क्षेत्रों के लिए)।
- पिछले 30 दिनों के दौरान रात्रिकालीनविहारों, जिनके मुख्य उद्देश्य, व्यवसाय, सामाजिक, तीर्थाटन एवं धार्मिक क्रियाकलाप, शिक्षा एवं प्रशिक्षण एवं अन्य थे, की औसतन संख्या प्रति 100 परिवारों के लिए 23 थी (23.5 ग्रामीण एवं 22.1 नगरीय क्षेत्रोंके लिए )

[कथन 3.1 बी और 3.1 सी]

## II. विहारों (ट्रिप्स) की विशिष्टताएं

- पिछले 365 दिनों के दौरान मुख्य उद्देश्यों यथा-छुट्टी, फुर्सत एवं मनोविनोद स्वास्थ्य एवं चिकित्सा और खरीदारी के लिए 19%परिवारों ने कम से कम एक रात्रिकालीन विहार दर्ज करवाया (19% ग्रामीण एवं 19% नगरीयपरिवारों के लिए)।
- पिछले 30 दिनों के दौरान मुख्य उद्देश्यों - व्यवसाय, सामाजिक तीर्थाटन एवं धार्मिक क्रियाकलाप, शिक्षा एवं प्रशिक्षण एवं अन्य में, 21%परिवारों ने कम से कम एकरात्रिकालीनविहार दर्ज करवाया। (21% ग्रामीण एवं 20% नगरीय परिवारों के लिए)।

[कथन 3.2]

## मुख्य बातें

- पिछले 365 दिनों के दौरान मुख्य उद्देश्यों जैसे-छुट्टी, फुर्सत एवं मनोविनोद, स्वास्थ्य एवं चिकित्सा और खरीददारी के लिए 118 रात्रिकालीन विहार प्रति 100 ग्रामीण पर्यटक परिवार एवं 121 रात्रिकालीन विहार प्रति 100 नगरीय पर्यटक परिवारों द्वारा किए गए ।
- पिछले 30 दिनों में मुख्य उद्देश्यों यथा-व्यवसाय, सामाजिक, धर्म एवं तीर्थाटन, शिक्षा एवं प्रशिक्षण औरअन्य के लिए 111 रात्रिकालीन विहार प्रति 100 ग्रामीण पर्यटक परिवार एवं 111 रात्रिकालीन विहार प्रति 100 नगरीय पर्यटक परिवार किए गए ।

[कथन 3.3]

- पिछले 365 दिनों में पूर्ण किए गए रात्रिकालीन विहार जिनके मुख्य उद्देश्य छुट्टी, फुर्सत एवं मनोविनोद, स्वास्थ्य व चिकित्सा एवं खरीददारी थे, में से 65% विहार स्वास्थ्य एवं चिकित्सा के उद्देश्य के लिए, 34% विहार छुट्टी, फुर्सत एवं मनोविनोद के लिए एवं शेष 1% खरीददारी के उद्देश्य हेतु किए गए ।
- पिछले 30 दिनों के दौरान पूर्ण किए गए रात्रिकालीन विहार जिनके मुख्य उद्देश्य व्यवसाय, सामाजिक, धार्मिक एवं तीर्थाटन, शिक्षा एवं प्रशिक्षण एवं अन्य थे, में से 86% विहार मुख्यतः सामाजिक, 8% विहार मुख्यतः धार्मिक एवं तीर्थाटन एवं शेष 6% विहार अन्य मुख्य उद्देश्यों के लिए थे ।

[कथन 3.4]

- पिछले 365 दिनों में पूरे किए गए रात्रिकालीन विहारों, जिनके मुख्य उद्देश्य थे- छुट्टी, फुर्सत एवं मनोविनोद, स्वास्थ्य एवं चिकित्सा एवं खरीददारी, का औसतन ट्रिप आकार 2.16 था (ग्रामीण के लिए 2.13 एवं नगरीय के लिए 2.23 ) ।
- पिछले 30 दिनों में पूर्ण किए गए रात्रिकालीन विहारों, जिनके मुख्य उद्देश्य थे- व्यवसाय, सामाजिक, धार्मिक तीर्थाटन, शिक्षा एवं प्रशिक्षण एवं अन्य,का औसतन ट्रिपआकार 2.14 था (2.16 ग्रामीण एवं 2.09 नगरीय केलिए)

[कथन 3.6]

- पिछले 365 दिनों के दौरान छुट्टी, फुर्सत एवं मनोविनोद के उद्देश्य से पूर्ण किए गए विहारों में से 40% रात्रिकालीन विहार मई, जून एवं अक्टूबर माह में हुआ ।

[कथन 3.7]

- छुट्टी, फुर्सत एवं मनोविनोद,स्वास्थ्य,चिकित्सा एवं खरीददारी के मुख्य उद्देश्य के साथ पिछले 365 दिनों के दौरान पूर्ण किए गए विहारों में 2.6% पैकेज विहार एवं 97.4% गैर-पैकेजविहार थे।

## मुख्य बातें

- रात्रिकालीन विहार जो व्यवसाय, सामाजिक, धार्मिक एवं तीर्थाटन, शिक्षा एवं प्रशिक्षण एवं अन्य के मुख्य उद्देश्यों सहित पिछले 30 दिनों में पूरे किए गए, में 0.4% पैकेज विहार थे एवं 99.6% गैर-पैकेज विहार थे ।

[कथन 3.8]

- रात्रिकालीन विहारजो छुट्टी, फुर्सत एवं मनोविनोद, स्वास्थ्य एवं चिकित्सा एवं खरीददारी के मुख्य उद्देश्यों सहित पिछले 365 दिनों में पूरे किए गए -इसमें से 3.7%विहारों के व्यय की प्रतिपूर्ति हुई । (2.2% छुट्टी विहार के लिए, 4.5% स्वास्थ्य के विहार के लिए एवं 1.3% खरीददारी के विहार के लिए) ।

- रात्रिकालीन विहार, जोव्यवसाय, सामाजिक, धार्मिक एवं तीर्थाटन, शिक्षा एवं प्रशिक्षण तथा अन्य के मुख्य उद्देश्यों सहित पिछले 30 दिनों में पूरे किए गए,में से 8%विहारों के व्यय की प्रतिपूर्ति हुई (12.7% व्यवसाय विहारके लिए, 0.4% सामाजिक विहार के लिए, 1% धार्मिक विहार के लिए, 6.8% शिक्षा एवं प्रशिक्षण विहार के लिए एवं 3.9% अन्य विहार के लिए )

[कथन 3.9]

- पिछले 365 दिनों के दौरान ग्रामीण क्षेत्रों से पूर्ण किए गए रात्रिकालीन आगन्तुक विहार जिनके मुख्य उद्देश्य छुट्टी, फुर्सत एवं मनोविनोद, स्वास्थ्य एवं चिकित्सा एवं खरीददारी थे, में से 71.4% आगन्तुक विहार आगन्तुकों के उद्देश्यों जैसे-छुट्टी, फुर्सत एवं मनोविनोद, स्वास्थ्य एवं चिकित्सा एवं खरीददारी हेतु पूर्ण किए गए एवं बाकी 28.6% आगन्तुकों के उद्देश्य व्यवसाय, समाज, धार्मिक एवं तीर्थाटन, शिक्षा एवं प्रशिक्षण तथा अन्य हेतु पूर्ण किए गए ।

- पिछले 365 दिनों के दौरान नगरीय क्षेत्रों से पूर्ण किए गए रात्रिकालीन आगन्तुक विहार जिनके मुख्य उद्देश्य- छुट्टी, फुर्सत एवं मनोविनोद, स्वास्थ्य एवं चिकित्सा एवं खरीददारी थे, में से 84.8% आगन्तुक विहार आगन्तुकों के उद्देश्य जैसे-छुट्टी, फुर्सत एवं मनोविनोद, स्वास्थ्य एवं चिकित्सा एवं खरीददारी एवं शेष 15.2% आगन्तुक के उद्देश्य जैसे-व्यवसाय, सामाजिक, धार्मिक एवं तीर्थाटन, शिक्षा एवं प्रशिक्षण तथा अन्यों हेतु पूर्ण किए गए ।

- ग्रामीण क्षेत्र से रात्रिकालीन आगन्तुक विहार जो पिछले 30 दिनों के दौरान पूरे किए गए, जिनके मुख्य उद्देश्य व्यवसाय, सामाजिक, धार्मिक एवं तीर्थाटन, शिक्षा एवं प्रशिक्षण एवं अन्य थे, इसमें 99.3% आगन्तुक विहार आगन्तुकों के उद्देश्यों जैसे-व्यवसाय, सामाजिक, धार्मिक एवं तीर्थाटन, शिक्षा एवं प्रशिक्षण एवं अन्य के साथ पूर्ण हुए और शेष 0.7% आगन्तुक के उद्देश्य जैसे छुट्टी, फुर्सत एवं मनोविनोद, स्वास्थ्य एवं चिकित्सा एवं खरीददारी के साथ पूर्ण हुए ।

## मुख्य बातें

- नगरीय क्षेत्र से रात्रिकालीन विहार जो पिछले 30 दिनों के दौरान पूर्ण हुए, जिनका मुख्य उद्देश्य व्यवसाय, सामाजिक, धार्मिक एवं तीर्थाटन, शिक्षा एवं प्रशिक्षण एवं अन्य था, इनमें से 99.1 आगन्तुक विहार आगन्तुकों के उद्देश्य जैसे-व्यवसाय, सामाजिक, धार्मिक एवं तीर्थाटन, शिक्षा एवं प्रशिक्षण एवं अन्य के साथ पूर्ण हुए शेष 0.9% आगन्तुकों के उद्देश्यों जैसे-छुट्टी, फुर्सत एवं मनोविनोद स्वास्थ्य एवं चिकित्सा एवं खरीददारी के साथ पूर्ण हुए।

[कथन 3.10]

- ग्रामीण क्षेत्र में पिछले 365 दिनों के दौरान पूर्ण हुए 50% आगन्तुक विहारों के लिए बस यात्रा सबसे सुविधाजनक तरीका था जबकि नगरीय क्षेत्र में बस (34%) एवं ट्रेन (31%) करीब-करीब एक समान प्रयोग किए गए।
- पिछले 30 दिनों के दौरान पूर्ण किए गए अगन्तुक विहारों के लिए ग्रामीणक्षेत्र से 70% आगन्तुक विहारों के लिए एवं नगरीय क्षेत्र के 55% आगन्तुक विहारों के लिए बस यात्रा का प्रमुख तरीका था।

[कथन 3.13]

- ग्रामीण क्षेत्र से 91% रात्रिकालीन विहार जो पिछले 365 दिन में पूर्ण किए गए, के लिए आगन्तुक अपने बन्धुओं एवं सगे-सम्बन्धियों के साथ या 'अन्य' स्थानों पर रहे जबकि नगरीय मामले में, विहारों के दौरान निवास करने का स्थान - दोस्तों अथवा रिश्तेदारों के घर (36.2%), 'अन्य' स्थान (33.2%), होटल एवं गेस्ट हाऊस (25.8%) थे।
- पिछले 30 दिनों के दौरान ग्रामीण एवं नगरीय क्षेत्रों से क्रमशः लगभग 90% एवं 86% आगन्तुक विहारों के दौरान रात्रिकालीन विराम हेतु दोस्तों एवं रिश्तेदारों के घर का उपयोग हुआ।

[कथन 3.14]

- उन रात्रिकालीन विहारों में से जो पूरे देशभर से शुरू हुए एवं पिछले 365 दिनों के दौरान मुख्य उद्देश्य-छुट्टी, फुर्सत एवं मनोविनोद, स्वास्थ्य एवं चिकित्सा एवं खरीददारी के साथ पूर्ण हुए, में सबसे अधिक संख्या के आगन्तुक विहार गन्तव्य स्थान के रूप में महाराष्ट्र (1.51 करोड़), तत्पश्चात् उत्तर प्रदेश (1.43 करोड़) के थे।
- पिछले 30 दिनों के दौरान पूर्ण हुए रात्रिकालीन आगन्तुक विहार जिनका मुख्य उद्देश्य- व्यवसाय, समाज, धार्मिक एवं तीर्थाटन, शिक्षा एवं प्रशिक्षण एवं अन्य थे, में उत्तर प्रदेश (1.60 करोड़) ने सबसे अधिक आगन्तुक विहार प्राप्त किए, तत्पश्चात् आंध्र प्रदेश एवं तेलंगाना (1.30 करोड़) ने प्राप्त किये।

[कथन 3.16]

## मुख्य बातें

- उन सभी रात्रिकालीन आगन्तुक विहारों में से जो कि पूरे देश से जनित हुए एवं मुख्य उद्देश्यों जैसे छुट्टी, फुर्सत एवं मनोविनोद, स्वास्थ्य एवं चिकित्सा एवं खरीददारी के साथ पिछले 365 दिनों के दौरान पूर्ण हुए में से महाराष्ट्र (1.60 करोड़) ने सबसे अधिक आगन्तुक विहारों को उत्पन्न किया, तत्पश्चात् उत्तर प्रदेश (1.44 करोड़) ने ।
- पिछले 30 दिनों के दौरान मुख्य उद्देश्य जैसे-व्यवसाय, सामाजिक, धार्मिक एवं तीर्थाटन, शिक्षा एवं प्रशिक्षण एवं अन्य के साथ किये गये रात्रिकालीन विहारों में उत्तर प्रदेश (1.63 करोड़) ने सबसे अधिक आगन्तुक विहार जनित किए, तत्पश्चात् आंध्र प्रदेश एवं तेलंगाना (1.26 करोड़) ने ।

[कथन 3.17]

- अखिल भारतीय स्तर पर, 51.7% परिवारों ने कम से कम एक उसी दिन का विहार पिछले 30 दिनों के दौरान पूर्ण किया (ग्रामीण 57.1% एवं नगरीय 40.6% परिवार) ।

[कथन 3.18]

- औसतन 163 उसी दिन के विहार (अर्थात् औसतन 1.6 विहार प्रति पर्यटक परिवार) प्रति 100 पर्यटक परिवार जनित हुए (ग्रामीण 169 एवं नगरीय 146) ।

[कथन 3.19]

- खरीददारी (35%) एवं सामाजिक (34%) सबसे अधिक बार या पुनः दोहराये जानेवाले एक ही दिन के विहार थे जो कि ग्रामीण परिवारों द्वारा किए गए, जबकि नगरीय क्षेत्रों में करीब आधे ऐसे विहार सामाजिक उद्देश्य हेतु थे ।

[कथन 3.20]

### III. विहारों पर व्यय

- पिछले 365 दिनों में पूरे किए गए रात्रिकालीन विहारों जिनके मुख्य उद्देश्य- छुट्टी, फुर्सत एवं मनोविनोद, स्वास्थ्य एवं चिकित्सा एवं खरीददारी थे, में से सबसे महंगा विहार स्वास्थ्य एवं चिकित्सा विहार, जिस का औसतन व्यय प्रति विहार (रु. 15336) था, तत्पश्चात् मुख्य उद्देश्य खरीददारी (रु. 13902), छुट्टी, फुर्सत एवं मनोविनोद (रु. 6358) थे।
- पिछले 30 दिनों में पूरे किए गए रात्रिकालीन विहार जिनका मुख्य उद्देश्य-व्यवसाय, समाज, धार्मिक क्रियाकलाप एवं तीर्थाटन, शिक्षा एवं प्रशिक्षण एवं अन्य था, में सबसे महंगा विहार व्यवसाय के लिए, जिसका औसतन व्यय (रु. 4455) था, तत्पश्चात् मुख्य उद्देश्य अन्य विहार (रु. 2875), धार्मिक क्रियाकलाप एवं तीर्थाटन (रु. 2717), शिक्षा एवं प्रशिक्षण (रु. 2286), एवं सामाजिक (रु. 1068) थे ।

## मुख्य बातें

---

[कथन 4.1]

- रात्रिकालीन विहारों के लिए पैकेज घटक पर कुल व्यय का % शेयर गैर-पैकेज घटक की तुलना में कम है- 1 से 2% ग्रामीण क्षेत्र के लिए एवं 9% से कम नगरीय क्षेत्र के लिए ।
- पिछले 365 दिनों के दौरान,दोनों क्षेत्रों के लिए, मुख्य उद्देश्य छुट्टी, चिकित्सा आदि के साथ किए गए विहारों के लिए अन्य मर्दों के मुकाबले चिकित्सा के मर्दों पर व्यय का शेयर काफी अधिक था (ग्रामीण 74.8% एवं नगरीय 50.5%)।
- पिछले 30 दिनों के दौरान,दोनों क्षेत्रों के लिए, मुख्य उद्देश्य-व्यवसाय, समाजिक,धार्मिक क्रिया कलाप आदि के साथ किए गए विहारों के लिएयातायात एवं खरीददारी मर्दों पर व्यय 67% से अधिक था।

[कथन 4.2]

- अखिल भारतीय स्तर पर, एक-ही-दिन के विहार का औसतन व्यय रु. 620 था (ग्रामीण रु. 576 एवं नगरीय रु. 767) ।

[कथन 4.6]

- ग्रामीण परिवारों द्वारा एक-ही-दिन के विहारों के लिए खरीददारी करीब कुल व्यय का 58% थी जबकि नगरीय परिवारों के लिए, खरीददारी कुल व्यय का करीब 47% थी ।

[कथन 4.7]

## Highlights

---

A survey on 'Domestic Tourism expenditure' was conducted in NSS 72<sup>nd</sup> round (July 2014-June 2015). A sample of 79497 rural households from 8001 villages and 60191 urban households from 6061 blocks were surveyed all over India.

Highlights of the findings of the survey are given below.

### I. Household profile

- At all- India level average household size was 4.4 with 4.59 in rural areas and 4.01 in urban areas.  
*[Statement 3.1a]*
- Around 36.6% of rural households and 35.7 % of urban households reported overnight trips with leading purposes holidaying, leisure and recreation ;health & medical and shopping during last 365 days and/or with leading purposes business; social; pilgrimage & religious activities; education & training and others during last 30 days.
- Average no. of overnight trips with leading purposes holidaying, leisure and recreation ;health & medical and shopping undertaken during last 365 days per 100 household was 22.2 ( 22.1 for rural and 22.4 for urban areas).
- Average no. of overnight trips with leading purposes business; social; pilgrimage & religious activities; education & training and others undertaken during last 30 days per 100 household was 23 ( 23.5 for rural and 22.1 for urban areas).

*[Statement 3.1b & 3.1 c]*

### II. Characteristics of trips

- 19% of households reported at least one overnight trip with leading purposes holidaying, leisure and recreation, health & medical and shopping during last 365 days (19% - for rural and urban households each).
- 21% of households reported at least one overnight trip with leading purposes business, social, pilgrimage & religious activities, education & training and others during last 30 days (21% - for rural and 20% urban households ).

*[Statement 3.2]*

## Highlights

---

- With leading purpose holidaying, leisure and recreation, health & medical and shopping - 118 overnight trips per 100 rural tourist households and 121 overnight trips per 100 urban tourist households were undertaken during last 365 days.
- with leading purposes business, social, religious & pilgrimage, education & training and others - 111 overnight trips per 100 rural tourist households and 111 overnight trips per 100 urban tourist households were undertaken during last 30 days.

*[Statement 3.3]*

- For the overnight trips completed during last 365 days with leading purposes holidaying, leisure and recreation, health & medical and shopping- 65% trips for health & medical purpose , 34% trips for holidaying, leisure & recreation purpose and remaining 1% for shopping purpose.
- For the overnight trips completed during last 30 days with leading purposes business, social, religious & pilgrimage, education & training and others- 86% trips for leading purpose social , 8% trips for leading purpose religious & pilgrimage and remaining 6% trips for other purposes.

*[Statement 3.4]*

- For the overnight trips completed during last 365 days with leading purposes holidaying, leisure and recreation, health & medical and shopping- Average trip size was 2.16 (2.13 for rural and 2.23 for urban).
- For the overnight trips completed during last 30 days with leading purposes business, social, religious & pilgrimage, education & training and others- Average trip size was 2.14 (2.16 for rural and 2.09 for urban)

*[Statement 3.6]*

- Month of May, June & October generated over 40% of overnight trips among the trips completed during last 365 days with leading purpose holidaying, leisure & recreation.

*[Statement 3.7]*

- Overnight trips completed during last 365 days with leading purposes holidaying, leisure and recreation, health & medical and shopping- 2.6% were package trips and 97.4% were non-package trips.
- Overnight trips completed during last 30 days with leading purposes business, social, religious & pilgrimage, education & training and others- 0.4% was package trips and 99.6 % were non-package trips.

*[Statement 3.8]*

- For the overnight trips completed during last 365 days with leading purposes holidaying, leisure and recreation; health & medical and shopping-expenditure for 3.7% trips was reimbursed (2.2% for holidaying trips, 4.5% for health trips and 1.3% for shopping trips ).
- For the overnight trips completed during last 30 days with leading purposes business, social, religious & pilgrimage, education & training and others-expenditure for 8% trips was reimbursed (12.7% for business trips, 0.4% for social trips, 1% for religious trips, 6.8% for education & training trips and 3.9% other trips ).

*[Statement 3.9]*

- For the overnight visitor trips from rural area completed during last 365 days with leading purposes holidaying, leisure and recreation, health & medical and shopping- 71.4% of visitor trips were completed with visitor's purposes holidaying, leisure and recreation; health & medical and shopping and rest 28.6% with visitor's purposes business, social, religious & pilgrimage, education & training and others.
- For the overnight visitor trips from urban area completed during last 365 days with leading purposes holidaying, leisure and recreation; health & medical and shopping – 84.8% of visitor trips were completed with visitor's purposes holidaying, leisure and recreation; health & medical and shopping and rest 15.2% with visitor's purposes business, social, religious & pilgrimage, education & training and others.

## Highlights

---

- For the overnight visitor trips from rural area completed during last 30 days with leading purposes business, social, religious & pilgrimage, education & training and others - 99.3% of visitor trips were completed with visitor's purposes business, social, religious & pilgrimage, education & training and others and rest 0.7% with visitor's purposes holidaying, leisure and recreation; health & medical and shopping.
- For the overnight visitor trips from urban area completed during last 30 days with leading purposes business, social, religious & pilgrimage, education & training and others – 99.1% of visitor trips were completed with visitor's purposes business, social, religious & pilgrimage, education & training and others and rest 0.9% with visitor's purposes holidaying, leisure and recreation; health & medical and shopping.

*[Statement 3.10]*

- Bus was the most availed mode of travel in rural area with 50% share of the visitor-trips completed during last 365 days whereas in urban area bus (34%) and train (31%) were almost equally used.
- For the visitor-trips completed during last 30 days, bus was the dominant mode of travel - for 70% of visitor-trips from rural area and 55% of visitor-trips from urban area.

*[Statement 3.13]*

- For 91% of overnight visitor trips from rural area completed during last 365 days, visitors stayed with friends & relatives or in 'other' places whereas in urban case , place of stay during trips were- friends & relatives (36.2%), 'other' places (33.2%), hotel & guest house (25.8%).
- Around 90% and 86% of visitor-trips from rural and urban areas respectively completed during last 30 days, availed friends & relatives house for overnight stay during the trips.

*[Statement 3.14]*

- Maharashtra had the maximum number of visitor trips (1.51 crores) as destination place followed by Uttar Pradesh( 1.43 crores) out of those overnight visitor trips originated from all over the country which completed during last 365 days with leading purposes holidaying, leisure and recreation, health & medical and shopping.
- For Overnight visitor trips completed during last 30 days with leading purposes business, social, religious & pilgrimage, education & training and others, Uttar Pradesh (1.60 crores) received maximum number of visitor trips followed by Andhra Pradesh & Telangana (1.30 crores)

*[Statement 3.16]*

- Maharashtra (1.60 crores) generated maximum number of visitor trips followed by Uttar Pradesh (1.44 crores) out of all overnight visitor trips generated from all over the country which completed during last 365 days with leading purposes holidaying, leisure and recreation, health & medical and shopping.
- For Overnight visitor trips completed during last 30 days with leading purposes business, social, religious & pilgrimage, education & training and others, Uttar Pradesh (1.63 crores) generated maximum number of visitor trips followed by Andhra Pradesh & Telangana (1.26 crores)

*[Statement 3.17]*

- At all India level, 51.7% households reported at least one same day trip completed during last 30 days ( rural -57.1% and urban 40.6 % households).

*[Statement 3.18]*

- 163 same-day trips on an average (i.e. on the average 1.6 trips per tourist household) were generated per 100 tourist household ( rural -169 and urban -146).

*[Statement 3.19]*

- Shopping (35%) and social (34%) were the two most frequent same-day trips undertaken by the rural households, whereas, in urban areas nearly half of such trips were for social purposes

*[Statement 3.20]*

### III. Expenditure on trips

- Among the overnight trips completed during last 365 days with leading purposes holidaying, leisure and recreation, health & medical and shopping-costliest trip was for Health & medical with average expenditure per trip ( ₹15336) followed by trips with leading purpose shopping (₹13902) and holidaying, leisure & recreation(₹6358).
- Among the overnight trips completed during last 30 days with leading purposes business, social, religious activities & pilgrimage, education & training and others- costliest trip was for Business with average expenditure per trip ( ₹4455) followed by trips with leading purposes others ( ₹2875), religious activities & pilgrimage( ₹2717), education & training ( ₹2286), and social ((₹1068)).

*[Statement 4.1]*

- % share of total expenditure on Package component for overnight trips is low compared to that of non-package component – 1to 2% for rural sector and less than 9 % for urban.
- For trips undertaken during last 365 days with leading purposes holidaying, medical etc, for both the sectors, share of expenditure on medical items was quiet high( rural- 74.8% and urban- 50.5%) with respect to other items.
- For trips undertaken during last 30 days with leading purposes business, social, religious activities etc, for both the sectors, expenditure on transport and shopping items was more than 67%.

*[Statement 4.2]*

- At all India level, average expenditure per same-day trip was ₹ 620 (rural – ₹576 and urban – ₹767).

*[Statement 4.6]*

- For the same day trips undertaken by rural households, shopping constituted nearly 58 % of total expenditure whereas for urban households, shopping contributed nearly 47 % of total expenditure.

*[Statement 4.7]*

# *Chapter One*

---

## *Introduction*

### **1.1 Perspective**

1.1.1 The National Sample Survey Office (NSSO), Ministry of Statistics and Programme Implementation (MOSPI), Government of India, since its inception in 1950 has been conducting nationwide integrated large scale sample surveys, employing scientific sampling methods, to generate data and statistical indicators on diverse socio-economic aspects. The NSS surveys are conducted by interviewing sample households selected through a scientific design and cover practically the entire geographical area of Indian Territory.

1.1.2 In its 72<sup>nd</sup> round survey, conducted during 1<sup>st</sup> July, 2014 to 30<sup>th</sup> June, 2015 (in this report this period is referred to as 2014-15), NSSO carried out a survey on ‘Domestic Tourism Expenditure’. The last survey on this subject was conducted during 65<sup>th</sup> round of NSS (July 2008-June 2009), referred to as 2008-09. This report presents estimates of various characteristics pertaining to domestic tourism at national as well as State/UT levels in 2014-15, based on the results of NSS 72<sup>nd</sup> round survey.

### **1.2 Objective of the Survey**

1.2.1 The importance of domestic tourism, socially and economically, in a diversified, multi-cultural, multi-linguistic and multi-religious country like India needs no special mention. The tourism activity because of its multidimensionality generates revenues and creates employability across different economic sectors. However, tourism, per se, does not constitute any specific industry or sector in the economy but it encompasses several traditional economic sectors like transport, hotel and restaurants etc. Being a demand side phenomenon, the tourism is generally seen through the activities of the persons identified as tourists. Besides its economic importance, tourism has a great social importance in developing social bond among people of a pluralistic society like India.

1.2.2 NSSO had conducted an all-India household survey on domestic tourism during the period July 2014-June 2015. The purpose of the survey was primarily to obtain appropriate rates/ratios/tables for the use of Ministry of Tourism in preparing the Tourism Satellite Account (TSA); 3<sup>rd</sup> in the series. As per the requirement of TSA, focus of the survey was on capturing details of domestic overnight trips. Information on household characteristics, which are the important determinants of tourism characteristics, such as household size, principal industry, principal occupation, household type, religion, social group, household consumption expenditure, particulars of overnight trips completed during the reference period and expenditure incurred by the household on domestic tourism were captured. However some information on same-day trips was also captured. The indicators presented in this document are primarily on:

- a. Households reporting overnight trips
- b. Trips and visitor-trip characteristics of overnight trip
- c. Trip characteristics of same-day trip
- d. Tourism expenditure for both overnight and same-day trip

1.2.3 These indicators on domestic tourism are required for planning, policy formulation and decision making at various levels within the government and outside. The results of the survey are likely to be used by the Ministry of Tourism etc. apart from private data users, policy makers and other stakeholders.

### **1.3 Past NSS Surveys on Domestic Tourism**

1.3.1 A comprehensive household survey on domestic tourism for the first time was conducted by National Sample Survey Office (NSSO) during its 65<sup>th</sup> round (July 2008-June 2009) of operation. In that round, the survey was intended to provide estimates of the volume of domestic tourism in terms of number of *visitors* (i.e. persons performing trips), number of households undertaking domestic tourism activity and number of trips that contributed to domestic tourism and average tourism expenditure in India. In the 54<sup>th</sup> round (January-June 1998) of NSS, one of the subjects covered was tours involving overnight stay. The main household schedule of that round recorded details of journeys on tours involving overnight stay undertaken by household members during a specified period.

### **1.4 NSS 72<sup>nd</sup> round Survey on Domestic Tourism Expenditure**

**1.4.1 Geographical coverage:** The survey covered the whole of the Union of India.

**1.4.2 Population coverage:** The following rules were adhered to determine population coverage:

1. Under-trial prisoners in jails and indoor patients of hospitals, nursing homes etc., were excluded, but residential staff therein was listed while listing was done in such institutions. The persons of the first category were considered as members of their parent households and were counted there. Convicted prisoners undergoing sentence were outside the coverage of the survey.
2. Floating population, i.e., persons without any normal residence were not listed. But households residing in open space, roadside shelter, under a bridge, etc., more or less regularly in the same place, were listed.
3. Neither the foreign nationals nor their domestic servants were listed, if by definition the latter belonged to the foreign national's household. If, however, a foreign national became an Indian citizen for all practical purposes, he or she was covered.
4. Persons residing in barracks of military and paramilitary forces (like police, BSF, etc.) were kept outside the survey coverage due to difficulty in conduct of survey therein. However, civilian population residing in their neighbourhood, including the family quarters of service personnel, were covered.
5. Orphanages, rescue homes, *ashrams* and vagrant houses were outside the survey coverage. However, persons staying in old age homes, *ashrams/hostels* and the

residential staff (other than monks/ nuns) of these ashrams were listed. For orphanages, although orphans were not listed, the persons looking after them and staying there were considered for listing.

### **1.4.3 Sampling design**

1.4.3.1 A stratified multi-stage design was adopted for the 72<sup>nd</sup> round survey. The first stage units (FSU) were the census villages (Panchayat wards in case of Kerala) in the rural areas and Urban Frame Survey (UFS) blocks in the urban areas. The ultimate stage units (USU) were households in both rural and urban areas. In case of large FSUs, one intermediate stage of sampling was the selection of two hamlet-groups (hgs)/ sub-blocks (sbs) from each rural/ urban FSU.

**1.4.3.2 Selection of first-stage units:** A total of 8001 villages were surveyed in rural India and the number of urban blocks surveyed was 6061 as First-stage units (FSUs) in NSS 72<sup>nd</sup> round for the central sample at all-India level, selected by Probability Proportional to Size with Replacement (PPSWR). In addition to these, 'State samples' were also surveyed by State/UT Governments who participated in this survey. The results presented in this report are solely based on the central samples. State/UT wise FSUs surveyed in central samples are given in Statement 1.1 at the end of this chapter.

**1.4.3.3 Selection of second-stage units:** Stratification of the households was done on the basis of households having at least one member who performed overnight trip during last 365 days for medical/ holidaying/ shopping purpose or from the remaining, households having at least one member who performed any other overnight trip during last 30 days (details are given in Appendix B). For this particular survey, 10 households were selected using Simple Random Sampling without Replacement (SRSWOR) from each sample village/block. The total number of households in which Schedule 21.1 was canvassed, was 79497 and 60191 in rural and urban India respectively. State/UT-wise number of households in which Schedule 21.1 was canvassed is given in Statement 1.1.

**1.4.3.4 Sub-rounds:** The survey period of this round was divided into two sub-rounds of three months' duration each as follows:

- sub-round 1 : July - September 2014
- sub-round 2 : October - December 2014
- sub-round 3 : January - March 2015
- sub-round 4 : April - June 2015

### **1.5 Main features of the Survey**

1.5.1 Data were collected on household characteristics such as household size, principal industry, principal occupation, household type, religion, social group, household's usual monthly consumer expenditure.

1.5.2 Demographic and other particulars of all the household members which include name, age, gender, marital status, educational level, usual principal activity status.

1.5.3 Particulars of overnight trips completed by household members during (a) last 365 days for health & medical; holidaying, leisure & recreation; and shopping and (b) last 30 days for business; social; pilgrimage & religious activities; education & training; and others were collected.

1.5.4 particulars of overnight trips completed during last 365 days were collected only from those households which performed a trip with any of the leading purposes namely health & medical; holidaying, leisure & recreation; and shopping. Similarly particulars of overnight trips completed during last 30 days were collected only from those households which performed a trip with any of the leading purposes namely business; social; pilgrimage & religious activities; education & training; and **others (this doesn't include** health & medical; holidaying, leisure & recreation; and shopping).

1.5.5 Data on particulars of expenditure (₹) for all trips completed during last 365 days or 30 days with break-up of expenditure by accommodation; food and drink; transport; shopping; recreation etc. were collected along with information on reimbursement/direct payment by any institution.

1.5.6 Particulars and expenditure (₹) of same-day trips completed by household members during last 30 days were collected.

1.5.7 Information on particulars and expenditure (₹) of special domestic trips of duration of more than 180 days but less than or equal to 365 days, completed by household members during last 365 days was collected.

## **1.6 Comparability with previous round survey**

1.6.1 Though the survey on domestic tourism in NSS 72<sup>nd</sup> round covered similar indicators of domestic tourism as in NSS 65<sup>th</sup> round, some changes have been made in the subject coverage and in related concepts and definitions based on the experiences of previous round survey and also keeping in mind that the main thrust of this round was to collect information required for preparation of Tourism Satellite Account.

- a. Overnight stay was defined as a duration of stay of more than 12 hrs. including 12 midnight to 5 A.M. in this current round whereas in previous round, the duration covered at least two calendar days, wholly or partly.
- b. In NSS 65<sup>th</sup> round, particulars of overnight trips and expenditure incurred were collected for the reference period of last 30 days only. There was only one question related to last 365 days i.e. ‘number of overnight trips undertaken by the household during last 365 days’. But in NSS report 536 (Domestic Tourism in India, 2008-09, NSS 65<sup>th</sup> round), all the estimates were derived using the information collected for the reference period of last 30 days and these estimates were inflated for 365 days for presentation in this report. In this round (NSS 72<sup>nd</sup>) two reference periods have been used- one is last 30 days -for the overnight trips completed with leading purposes *business, social, pilgrimage and religious activities, education and training* and *others* and second one is last 365 days – for the overnight trips completed with

- leading purposes *holidaying, leisure and recreation; health & medical and shopping*. In this report, results have been presented for the two reference periods separately. Therefore the tabulated results cannot be compared with those of NSS 65<sup>th</sup> round.
- c. For same-day trips detailed information was collected only at household level and not for individuals in this survey, unlike in 6<sup>5th</sup> round survey.
  - d. No information was collected on total number of trips undertaken by the household and by the individuals during last 365 days in this survey. In 65<sup>th</sup> round survey these information were collected through a single question irrespective of the leading purpose/purpose of the trip/visitor-trip.
  - e. In NSS 65<sup>th</sup> round, trip expenditure was canvassed for latest three trips by the household. Whereas in the current round expenditure details were collected for all the overnight trips completed by the household during the reference period.
  - f. For international trips, final domestic port of departure was canvassed in this round.
  - g. Information on usual household consumer expenditure (₹) in a month was collected through a single question, in place of the five questions in earlier round.
  - h. Information of items like visits (if any) of NRIs to the household and their impact, renting out of some portion of the house to tourists during the last 365 days, awareness about tourism promotional campaigns were not collected in NSS 72<sup>nd</sup> round unlike in previous round.

## **1.7 Key Indicators of the 72<sup>nd</sup> round Survey on Domestic Tourism Expenditure**

1.7.1 A Key Indicator document titled “*Key Indicators of Domestic Tourism in India*” was released in June, 2016, within a year of completion of field work of the survey to facilitate decision support, policy inferences and socio-economic analysis. The document contained *inter-alia* a brief summary of the significant information on the key indicators and State/UT tables on key indicators in addition to its conceptual framework.

## **1.8 Reference period**

1.8.1 The estimates presented in this report are based on data collected during 01.07.2014 to 30.06.2015, a period of one year.

1.8.2 The reference period for capturing data on overnight trips was last 365 days with reference to leading purposes holidaying, leisure and recreation; health & medical and shopping. On the other hand, reference period for capturing data on overnight trips was last 30 days with reference to leading purposes business; social; pilgrimage and religious activities; education & training; and others. The reference period for capturing data on same-day trips was last 30 days for all trips.

## 1.9 Quintile class of Usual Monthly Per Capita Consumer Expenditure (UMPCE)

Statement 1.2: Lower and upper limits of UMPCE in different quintile classes for each sector				
quintile class of UMPCE	UMPCE (₹)			
	rural		urban	
	lower limit	upper limit	lower limit	upper limit
(1)	(2)	(3)	(4)	(5)
1	-	889	-	1429
2	889	1167	1429	2000
3	1167	1400	2000	2500
4	1400	1800	2500	3600
5	1800	-	3600	-

1.9.1 This refers to the 5 quintile classes of the rural/urban all-India distribution (estimated distribution) of households by UMPCE. In the tables, the different quintile classes are referred to simply as 1 (lowest quintile class), 2, 3, 4 and 5 (highest quintile class).

1.9.2 Statement 1.2 shows the lower and upper limits of the all-India quintiles to have an idea of level of living of the households belonging to these quintile classes.

## 1.10 Contents of this report

1.10.1 This report brings out the detailed results of NSS 72<sup>nd</sup> round. It is presented in four chapters and three appendices. This is the introductory chapter (i.e. Chapter One). Concepts and definitions used in this survey are illustrated in details in Chapter Two. Chapter Three (features of domestic tourism) and Chapter Four (domestic tourism expenditure) give the summary findings on various aspects of tourism from the results of the survey. Appendix A provides the detailed tables. Brief discussions on sample design and estimation procedure are given in Appendix B and lastly in Appendix C, the schedule of enquiry (Schedule 21.1) which was canvassed at the selected households is provided.

1.10.2 The analysis is focussed at all-India level. State level estimates of few important parameters have been summarised in some Appendix Tables. Mostly, ratios/distributions are presented, while the aggregates of population/household are given as marginal row/column totals in the detailed Appendix tables.

1.10.3 It is important to note that some estimates for the smaller States/UTs and at some detailed levels in the statements or in Appendix tables (in Appendix A) may be subject to high sampling fluctuations as such estimates may be based on very small sample sizes. In some cells of appendix tables zero or negligible figures are reported, which are due to either zero sample values or very small sample values. Such estimates should be used and interpreted with due care.

1.10.4 In this survey, information was collected on the state of main destination outside the state of origin for overnight trips. Since the state of Telangana was not a separate State before the finalisation of the survey instruments, no specific code was assigned for the State of Telangana in the Schedule of enquiry. Thus, information for the main destination as the State of Telangana was not available.

1.10.5 In collecting information on gender of each household member, a new code as Transgender was introduced for the first time in this round. However, as a very few sample cases at all-India level for transgender were reported, no information on visitor characteristics for transgender is separately presented in this document.

**Statement 1.1: Number of FSUs (villages/blocks) allotted & surveyed and number of households surveyed for Schedule 21.1: NSS 72<sup>nd</sup> round, Central sample**

State/UT	number of FSUs (villages/blocks) allotted		number of FSUs (villages/blocks) surveyed		no. of households surveyed

## ***Chapter Two***

---

## ***Concepts & Definitions***

### **2.1 Basic Concepts**

**2.1.1 Household:** A group of persons normally living together and taking food from a common kitchen constitutes a household. It includes temporary stay-aways (those whose total period of absence from the household is expected to be less than 6 months) but excludes temporary visitors and guests (expected total period of stay less than 6 months).

Even though the determination of the actual composition of a household was left to the judgment of the head of the household, the following procedures were adopted as guidelines.

- (i) Each inmate (including residential staff) of a hostel, mess, hotel, boarding and lodging house, etc., will constitute a single-member household. If, however, a group of persons among them normally pool their income for spending, they will together be treated as forming a single household. For example, a family living in a hotel will be treated as a single household.
- (ii) More emphasis is given on ‘normally living together’ than on ‘ordinarily taking food from a common kitchen’. In case the place of residence of a person is different from the place of boarding, he or she is treated as a member of the household with whom he or she resides.
- (iii) A resident employee, or domestic servant, or a paying guest (but not just a tenant in the household) is included in the employer’s/host’s household. However, in special case of a person taking food with his family but sleeping elsewhere (say, in a shop or a different house) due to space shortage, he has to be counted as a member of the household formed by other members of his family.
- (iv) If a member of a family (say, a son or a daughter of the head of the family) stays elsewhere (say, in hostel for studies or for any other reason), he/ she will not be considered as a member of his/ her parent’s household. However, he/ she will be listed as a single member household if the hostel is listed.

**2.1.2 Household size:** The size of a household is the total number of persons in the household.

**2.1.3 Household’s usual consumer expenditure (₹) in a month:** Household’s usual consumer expenditure is the sum total of monetary values of all goods and services usually consumed (out of purchase/home produced or procured otherwise) by the household on domestic account during a month. This has the following components which are given below:

- A. Usual expenditure for household purposes in a month.
- B. Purchase value of any household durables (mobile phones, TV sets, fridge, fans, cooler, AC, vehicles, computers, furniture, kitchen equipment, etc.) purchased during the **last one year** and the expenditure **per month** obtained by dividing by 12.
- C. If any household consumption (usually) from (a) wages in kind (b) home-grown stock (c) free collection was there, then the approximate monthly value of the amount usually consumed in a month was imputed.

Then the sum of A+B+C is taken as household's usual consumer expenditure in a month in whole number of rupees. Usual monthly per capita consumer expenditure (UMPCE) for a household is the household's usual consumer expenditure in a month divided by that household size.

**2.1.4 Quintile class of UMPCE:** A single set of UMPCE distribution (separately for rural and urban) was generated for each State/UT and at all-India level based on all the members of the household. UMPCE quintile distribution, for a part of the population, say, persons undertaken overnight trips or same-day trips for different purposes in a particular State/UT in rural/urban areas, was assumed to be same as the UMPCE distribution of the entire population of that State in rural/urban areas. It is assumed that UMPCE distribution of households is same as the UMPCE distribution of the persons belonging to those households.

**2.1.5 Travel:** In general, *travel* is understood as the movement of persons between different geographic locations specifically different geographical administrative areas (like different villages/towns/cities), for any purpose and any duration. Those who travel are referred to as travelers. Travel can occur within a country (domestic travel) or involve more than one country (international travel). Domestic trip (defined later, separately for overnight and same-day) is a subset of domestic travel.

**2.1.6 Usual Place of Residence:** The usual place of residence (UPR) of a person is the place (village/town) where the person has been staying continuously for at least six months immediately prior to the date of survey. Even if a person was not staying in the village/town continuously for six months immediately prior to the date of survey but is presently staying there with intention to stay there continuously for six months then that place should be taken as his/her UPR.

**2.1.7 Usual Environment:** The *usual environment* (UE) of an individual refers to the notional geographical space, including his/her UPR, within which he/she moves more or less regularly and frequently (daily/ every alternate day or at least once in a week repeatedly/ likely to be repeated for more than six months for the same purpose) irrespective of the distance.

The *usual environment* of an individual includes the place of usual residence of the household to which he/she belongs, his/her own place of work or study and any other place that he/she visits more or less regularly and frequently, even when this place is located far away from his/her place of usual residence or in another locality.

The purpose of introducing the concept of usual environment was to **exclude** the travelers who move regularly between their UPR and place of work or study, or more or less regularly and frequently visit places, like homes of friends or relatives, shopping centers, religious places, health care centers or to avail any other facilities, between geographical locations irrespective of their distance.

**2.1.8 Domestic Overnight Trip:** A domestic overnight trip is one with a main destination within the country of residence of the visitor. It refers to a movement - for a duration of not less than twelve hours (including 12 midnight to 5 A.M.) in two consecutive calendar days (i.e. crossing midnight or 00-00 hours) and of not more than 6 months - by one or more household members outside their usual environment (which includes the usual place of residence (UPR)) and return to the same UPR (a round trip), irrespective of place of stay during this hours. The movement is for any of the following purposes:

- Business
- Holidaying, leisure & recreation
- Social
- Pilgrimage & Religious
- Education and Training
- Health and Medical
- Shopping
- Others

The followings were excluded from the purview of domestic trip:

- i. Any movement for the purposes of migration or getting employed or setting up of residence in that place.
- ii. Movements between UPR and the place of work or study.
- iii. All movements, made more or less regularly and frequently from the UPR and back (daily/ every alternate day or at least once in a week) for shopping, visiting family, for religious purpose, health and medical care, education and training, etc. repeatedly/likely to be repeated for a period of more than six months for the same purpose, was not considered as trips irrespective of the distance travelled.
- iv. All the trips completed during the reference period by former household members who were currently not a member of that selected household at the time of survey.

Trips for persons who were household members at the time of survey but were not household members at the time of actually completing a trip within the reference period were also considered as trips for the selected household.

A trip is uniquely specified by its main destination, leading purpose, no. of household members in the trip being together (with variation of up to 3 days). ‘Being together’ means being in the same town or village for most of the time during the trip and also either starting or ending trip together. They can either start together but end the trip with a variation of up to 3 days or vice-versa.

In cases where set of destinations differed slightly from person to person (among household members who undertook the trip) they were considered to be on the same trip provided they were together for most of the time in the trip. But if two members of a household spent most of the time away from each other during the period since leaving their residence to returning to their residence, they were considered to have been on two different trips even though their starting and returning dates might be the same.

**2.1.9 Domestic Overnight Tourism:** It covered overnight trips by household members within the territory of India, either as a domestic trip or as domestic part of an international trip.

**2.1.10 Domestic Overnight Visitor:** A *domestic overnight visitor* is a person (household member), residing in the country, who performed an overnight trip.

**2.1.11 Starting month:** The month in which a particular trip was started from UPR was the starting month of that trip. When many members of a household travelled together on a trip but one or more trip member started later than the rest, the earliest starting date of that trip by any household member were considered for determining the starting month.

**2.1.12 Purpose & Leading Purpose:** The *purpose of a trip* of a household member is that purpose but for which he/she would not have undertaken the trip. Whereas the *leading purpose of a trip* is that purpose without which none of the household members in that trip would have undertaken the trip. Leading purpose of a trip is unique to all the members participating in that trip.

**2.1.13 Main Destination:** The *main destination* of a trip is defined as the place, visiting of which was central to the decision to undertake the trip. However, if no such place could be identified by the informant, the main destination was taken as the place where the visitors spent most of their time during the trip. If the visitors spent the same amount of time in two or more places during the trip, then the main destination was defined as the one among these places that was the farthest from the usual place of residence of the visitors.

**2.1.14 Type of trip:** A trip could be of two types—package and non-package. The term package trip, to be used in the survey, is given below.

**2.1.14.1 Package Trip:** A package trip consisted of a “tourism product” provided by a tour-operator which elaborates it and sells it directly or through travel agencies. Within a package trip, travellers received a combination of products associated with a trip, which were made of more than one of the following tourism services: Transportation services, accommodation services, food serving services, sightseeing services, entertainment services, etc. and other goods and services at will.

The components of a package trip might be pre-established or tailor-made, in which case, the visitor chooses a combination of services he / she wishes to acquire from a pre-established list of such services. If such a package was availed of for the major part of time in a trip, such a trip was considered as a package trip.

If the expenditure on more than one chargeable travel services *availed for some time during the trip* did not cover the whole trip but covered only a minor time of the duration of the trip then such a trip was **not** considered as package trip although the trip had a package component. A package trip may have a non-package component in addition to package component, e.g., a visitor may avail himself of accommodation and other services in the package through some tour operator but make some special sight-seeing arrangements in some places of visit in the trip on his own. Similarly, a trip, which is non-package, may also have package component in addition to non-package component.

**2.1.15 Mode of travel:** *Mode of travel* refers to means of transport used by visitor(s) to travel in a trip. The travel relevant here was the travelling done to cover the distances to the destinations and not joyrides or movement for adventure, as in skiing or boating for pleasure, or walking inside a museum, fort or maze. Visitor(s) might be using one or more means of transport in a trip, such as: on foot, bus, train (railways), ship/boat, air, own transport: motorised (such as, two-wheeler, auto rickshaw, car/jeep, tractor/truck etc.) , non-motorised (e.g. bicycle, rickshaw, animal driven transport etc.); transport equipment rental (hired transport): motorised (such as, two-wheeler, auto rickshaw, car/jeep, taxi, tractor/truck etc.) , non-motorised (e.g. bicycle, rickshaw, animal driven transport etc.)

**2.1.15.1 Major and minor mode of travel:** The means of transport by which maximum distance was travelled was treated as ‘major’ *mode of travel* for that trip. In case more than one such mode was there [e.g. train, air] for which equal distance was travelled then entry to be recorded for that means which was more expensive.

The means of transport by which second maximum distance was travelled will be treated as ‘minor’ *mode of travel* for that trip.

**2.1.16 Type of stay:** The *type of stay* refers to the accommodation used for stay by visitor(s) in an overnight trip. Accommodation refers to the space, whether paid or unpaid, where the visitor(s) spent some considerable time for spending night, taking rest, spending some leisure time, refreshing oneself, etc. during the trip. It could be hotel, guest house, dharamshala, rented

house, friends & relatives houses, others (carriages / coaches, railway station, ship/boat, waiting rooms, airport lounge etc.)

**2.1.16.1 Major and minor type of stay:** The place where the highest number of nights was spent was treated as ‘major’ type of stay. In case more than one such place was there (e.g. hotel, Dharamshala) where same no. of nights was spent then information was captured for that type of stay which was more expensive.

The place where second highest number of nights was spent will be treated as ‘minor’ type of stay.

**2.1.17 No. of nights spent outside usual place of residence (including journey):** The number of nights spent by the visitor outside his/her usual place of residence from starting of the trip to the completion of the trip, including the nights spent in transit.

**2.1.18 Tourism Expenditure:** For the purpose of this survey tourism expenditure included expenditure made not just during the trip but also the expenditure related to the trip even if made before or after the trip. It included all expenses related to the trip **paid or payable** by the household. It also included expenditure related to the trip, whether directly paid or reimbursed, by some institution like Government or other agencies on behalf of the selected household. All expenditure in connection with the trip **except** those used for productive purposes/enterprises was included. All the expenditure incurred relating to the trip performed by the member (s) of the sample household during the reference period was included irrespective of the source of expenditure, i.e. whether the expenditure had been incurred by the sample household or not. The payment might be made through cash, cheque, credit card, debit card, in instalments, etc. The total expenditure in all such cases irrespective of mode of payment was recorded.

The components of tourism expenditure were classified as under:

- a) Package component
- b) Non-package component, which were further sub-divided as below:
  - i. Accommodation
  - ii. Food and drink
  - iii. Transport
  - iv. Recreation, religious, cultural, sporting and health related activities
  - v. Shopping
  - vi. Others

#### Tourism expenditure includes

- Monetary expenditure on goods and services paid or payable by the visitor out of his/her own pocket or reimbursed by some institution like Government or other

- agencies/individuals or expenses of the visitor directly paid by such institutions/individuals;
- Expenditure incurred on items of high unit values like cars, computers, etc. related to a trip if those were used for consumption purpose and not for productive purpose.

### **Tourism expenditure excludes**

- The payment of taxes and duties not levied on products (goods and services);
- The purchase of financial and non-financial assets, including land, real estate but excluding high unit values like cars, computers, etc. if those are used for consumption purposes;
- All transfers of cash or used goods such as donations to charities or to members of other households as these do not correspond to the purchase of consumption goods or services from these charities or individuals. Alms, bribes, cash tips, cash gifts etc. were also excluded;
- The payment of all classes of interest, including those on expenditures made during and for trips

**2.1.19 Domestic Same-day Trip:** A **domestic same-day trip** is one that does not involve an overnight stay (i.e. duration of more than 12 hrs and including 12 midnight to 5 A.M.) but fulfill other conditions of overnight trips, irrespective of the number of hours spent on the trip. Same-day trip can be either completed on a same calendar date or spread over two consecutive calendar dates with a main destination within the country of residence of the visitor, for any of the following purposes:

- Business
- Holidaying, leisure & recreation
- Social
- Pilgrimage & Religious
- Education and Training
- Health and Medical
- Shopping
- Others

Like in overnight trips, all movements of persons, whose nature of work/job was regular touring outside their UPR to different places, like, mobile hawkers, on-board staff of airlines /ship/railways or of buses or of hired taxis and other public transports etc. was **not** considered as trips (overnight or same-day). However movements of medical representatives, sales executives, field investigators, who have to travel to different places, other than their main place of work from where they report to their controlling officer/ get salary etc., in relation to their official work/ business, were considered as trips.

**2.1.20 Domestic Same-day Visitor:** A *domestic same-day visitor* was a person (household member), residing in the country, who performed a same-day trip.

# **Chapter Three**

---

## *Features of Domestic Tourism*

### **3. 1 Introduction**

This chapter summarises various features of domestic tourism based on the survey estimates of NSS 72<sup>nd</sup> round. The activity of domestic tourism undertaken by the members of the households has two distinct features, viz. the *trip* and the *visitor*. As explained in Chapter Two, the trip, either same-day or overnight, was the ultimate unit to study the activity of domestic tourism and it related to the movement of one or more members of the household to a main destination with a leading purpose. The members of the households who happened to be the members of the trip are the visitors. As every trip has a purpose and occurrence of trips are more frequent for certain purposes, hence information on overnight trips was collected on two different reference period namely ‘last 365 days’ and ‘last 30 days’ preceding the date of survey. However, for same day trip only one reference period was used, ‘last 30 days’ preceding the date of survey. For better understanding of the terms used in this chapter and ensuing one, Chapter Two may be seen. The state wise RSEs are presented at the end of this chapter

### **3.2 Household Characteristics**

Statement 3.1a gives the rural and urban bifurcation of estimated households and population. Estimated population as per this survey was 111.6 crores with rural share of about 70% in total population. Estimated number of households was 25.4 crores at all-India level, out of which nearly 67% were in rural areas. State/UT wise estimated numbers of households and population separately for rural and urban areas are provided in Table 1 of Appendix A.

Statement 3.1a: Estimated number (00) of households and population for each sector			
sector	no. of households (00)	population (00)	Average household size
(1)	(2)	(3)	(4)
rural	1704225	7819765	4.59
urban	833797	3340290	4.01
<b>rural + urban</b>	<b>2538022</b>	<b>11160055</b>	<b>4.40</b>

Ref: Table 1, Appendix A

Statement 3.1b reveals that at all India level, 36% of households reported to have completed at least one overnight trip with leading purposes holidaying, leisure and recreation, health & medical and shopping completed during last 365 days and or at least one overnight trip with leading purposes business, social, religious & pilgrimage, education & training and others during last 30 days.

Statement 3.1c shows that with leading purpose holidaying, leisure and recreation, health & medical and shopping - 22 overnight trips per 100 households were undertaken during last 365 days where as 23 overnight trips per 100 households were undertaken with leading purposes business, social, religious & pilgrimage, education & training and others during last 30 days.

<b>Statement 3.1b: Percentage of households reporting at least one overnight trip with leading purposes for each sector</b>		
sector	estimated no. of households (00)	percentage of households reporting at least one overnight trip*
(1)	(2)	(3)
rural	1704225	36.6
urban	833797	35.7
rural+urban	2538022	36.3

\*: percentage of households reporting at least one overnight trip with leading purposes holidaying, leisure and recreation; health & medical and shopping completed during last 365 days and/or business, social, religious & pilgrimage, education & training and others completed during last 30 days

Ref: Table 1, Appendix A

<b>Statement 3.1c: Average number of overnight trips per 100 households for different leading purpose</b>			
leading purpose	rural	urban	rural+urban
(1)	(2)	(3)	(4)
<b>completed during last 365 days</b>			
holidaying, leisure & recreation	5.0	12.7	7.5
health & medical	16.9	9.5	14.4
shopping	0.2	0.2	0.2
<b>all (incl. n.r.)</b>	<b>22.1</b>	<b>22.4</b>	<b>22.2</b>
<b>completed during last 30 days</b>			
business	0.4	0.7	0.5
social	20.5	18.3	19.8
religious & pilgrimage	1.8	2.2	1.9
education & training	0.2	0.3	0.3
others	0.6	0.6	0.6
<b>all (incl. n.r.)</b>	<b>23.5</b>	<b>22.1</b>	<b>23</b>

Ref: Table 1 & Table 14, Appendix A

**3.3 Extent of Tourism activity:** The extent of tourism activity in the context of overnight trip may be measured by percentage of households reporting at least one overnight trip during the reference period. Statement 3.2 presents percentage of households reporting at least one overnight trip during the respective reference period for both rural and urban areas for 18 selected states. These 18 states covers 95% population as per census 2011. It is observed that overall on all-India level 19% households have reported at least one overnight trip with

leading purposes holidaying, leisure and recreation, health & medical and shopping completed during last 365 days and 21% households with leading purposes business, social, religious & pilgrimage, education & training and others completed during last 30 days. At all India level, no marked difference is observed between rural and urban households as far as reporting of at least one overnight trip completed during both the reference periods of last 365 days and last 30 days preceding the date of survey.

**Statement 3.2: Percentage of households reporting at least one overnight trip during the reference period for selected States**

State	percentage of households reporting at least one overnight trip with leading purposes					
	holidaying, leisure and recreation, health & medical and shopping completed during last 365 days			business, social, religious & pilgrimage, education & training and others completed during last 30 days		
	rural	urban	rural + urban	rural	urban	rural + urban
(1)	(2)	(3)	(4)	(5)	(6)	(7)
Andhra Pradesh	17	9	14	25	33	28
Assam	9	15	10	15	14	15
Bihar	16	16	16	17	19	17
Chhattisgarh	11	15	12	19	15	18

<b>all-India</b>	<b>19</b>	<b>19</b>	<b>19</b>	<b>21</b>	<b>20</b>	<b>21</b>

Ref: NSS KI (72/21.1)

### 3.4 Intensity of Tourism activity:

**3.4.1** The intensity of tourism activity in the context of overnight trip during last 365 days is presented in the statement 3.3. This is measured by the number of overnight trips generated per 100 households reporting at least one overnight trip during last 365 days with leading purposes holidaying, leisure and recreation, health & medical and shopping. It reveals that there is negligible difference between rural and urban tourist households in undertaking overnight trips. With leading purpose holidaying, leisure and recreation, health & medical and shopping - 118 overnight trips per 100 rural tourist households and 121 overnight trips per 100 urban tourist households were undertaken during last 365 days .

**3.4.2** Statement 3.3 also gives the intensity of tourism activity in the context of overnight trip during last 30 days. This is measured by the number of overnight trips generated per 100 households reporting at least one overnight trip during last 30 days with leading purposes business, social, religious & pilgrimage, education & training and others. Practically, there is no difference between rural and urban households in respect of overnight trips performed with leading purposes business, social, religious & pilgrimage, education & training and others during last 30 days - 111 overnight trips per 100 rural tourist households and 111 overnight trips per 100 urban tourist households.

<b>Statement 3.3: Average number of overnight trips per 100 tourist households* for different leading purpose</b>		
<b>leading purpose</b>	<b>rural</b>	<b>urban</b>
(1)	(2)	(3)
<b>completed during last 365 days</b>		
holidaying, leisure & recreation	27	68
health & medical	90	51
shopping	1	1
<b>all (incl. n.r.)</b>	<b>118</b>	<b>121</b>
<b>completed during last 30 days</b>		
business	2	3

education & training	1	2
others	3	3
<b>all(incl. n.r.)</b>	<b>111</b>	<b>111</b>

Ref: Table 22, Appendix A \*:Household reporting at least one overnight trip

### **3.5      Overnight trips by leading purpose:**

Statement 3.4 shows that out of 100 overnight trips completed during last 365 days, 65 trips were undertaken for health & medical purpose and 34 trips for holidaying, leisure & recreation purpose. It also shows that on an average out of 100 overnight trips completed during last 30 days, 86 trips were performed for social purpose and 8 trips for religious & pilgrimage purpose. However distribution pattern of overnight trips completed during last 365 days for rural and urban India is not same as more overnight trips are made for the health & medical purpose (76.6%) in rural areas compared to that in urban areas (42.4%). But overnight trips that are made for the purpose of business, social, religious & pilgrimage, education & training and others completed during last 30 days the distribution pattern in both rural and urban areas is almost same.

Statement 3.4: Percentage distribution of overnight trips by leading purpose			
leading purpose (1)	rural (2)	urban (3)	rural + urban (4)
<b>completed during last 365 days</b>			
holidaying, leisure & recreation	22.7	56.6	33.9

<b>all</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>

Ref: Table 14, Appendix A

### 3.6 Overnight trip by quintile classes of household UMPCE:

Statement 3.5R for rural & 3.5U for urban shows the distribution of overnight trips that are made for different purposes during reference period in the hierarchy of levels of living of the households classified as quintile classes of usual MPCE. In this context Household usual consumer expenditure is the sum total of monetary values of all goods and services usually consumed (out of purchase/home produced or procured otherwise) by the household on domestic account during a month. Here this is taken as a proxy for household level of living.

It is observed that number of overnight trips completed during the reference period for different purposes in rural areas is uniformly increasing over the quintile classes i.e. no. of overnight trips is highest among the households belonging to highest class of UMPCE except for leading purpose ‘others’ and education & training with reference period of last 30 days. The same feature is also seen in the urban areas on the whole but not uniform for each of the leading purposes.

Statement 3.5R: Percentage distribution of overnight trips by quintile class of UMPCE for each leading purpose of trip										
quintile class of UMPCE	completed during last 365 days with leading purpose				completed during last 30 days with leading purpose					
	holidaying, leisure and recreation	health & medical	shopping	all	business	social	religious & pilgrimage	education & training	others	all
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
00-20	13.0	12.8	8.1	12.8	14.0	14.9	11.0	10.0	16.8	14.6
20-40	14.6	16.2	20.3	15.9	14.2	17.3	15.3	19.5	18.7	17.1
40-60	13.0	19.5	15.8	18.0	14.4	20.6	17.8	19.3	16.1	20.2
60-80	18.9	22.8	22.2	21.9	22.8	22.1	22.2	16.3	24.6	22.1

<b>all</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>

Ref: Table 16, Appendix A

### 3.7 Average overnight trip size for each leading purpose:

Statement 3.6 reveals number of persons travelled together in an overnight trip. It gives an idea of the average trip size by presenting the average number of visitors per overnight trips, separately for rural and urban areas with different leading purposes. In rural areas, every overnight trips completed during last 365 days had 2.13 participating members and in urban areas, every overnight trips completed during last 365 days had 2.23 participants. Similarly in rural areas, every overnight trips completed during last 30 days had 2.16 participating members and in urban areas, every overnight trips completed during last 30 days had 2.09 participants.

However average size of the group travelling on an overnight trip varied noticeably with the leading purpose of the trip. It is observed that leading purpose holidaying, leisure & recreation attracts more visitors per overnight trip followed by leading purpose social. Statement 3.6 shows that Business trips (about 1.14 persons per trip for both rural and urban areas) and trips for education and training (about 1.30 persons per trip for both rural and urban areas) has the smallest number of members travelling together.

Statement 3.6: Average number of overnight visitors per overnight trip for different leading purpose			
leading purpose	rural	urban	rural + urban
(1)	(2)	(3)	(4)
<b>completed during last 365 days</b>			
holidaying, leisure & recreation	2.23	2.38	2.31
health & medical	2.11	2.03	2.09
shopping	1.84	2.10	1.92
<b>all (incl. n.r.)</b>	<b>2.13</b>	2.23	<b>2.16</b>

business	1.18	1.10	1.14
social	2.20	2.13	21.8
religious & pilgrimage	2.18	2.42	2.27
education & training	1.38	1.19	1.30
others	1.61	1.34	1.52
<b>all</b>	<b>2.16</b>	<b>2.09</b>	<b>2.14</b>

Ref: Table 14, Appendix A

### 3.8 Month of visit for overnight trips with leading purpose holidaying, leisure & recreation:

Intensity of tourism activity varies over the Starting month of overnight trip. However among the several leading purposes for overnight trip, intensity of tourism activity concentrated mostly for the starting month of May, June & October with leading purpose holidaying, leisure & recreation. It is clear from the statement 3.7 that the month of May, June & October generates over 40% of overnight trips among the trips with leading purpose holidaying, leisure & recreation and rest are distributed more or less evenly among the remaining 9 months. In fact, this phenomenon of intensity is more in the months of May, June & October for any purpose with reference to trips completed during last 365 days as observed from table 15 of Appendix A. It is also observed that tourism with leading purpose ‘shopping’ generated about 32% of overnight trips in the months of December, January and February (i.e. during winter season) which is much more than that for any other season.

**Statement 3.7: Percentage distribution of overnight trips by starting month with leading purpose holidaying, leisure & recreation completed during last 365 days**

Sector	starting month												all-India all (incl. n.r.)
	Jan.	Feb.	March	April	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)	(14)

### 3.9 Type of Trip:

**Statement 3.8: Per 1000 distribution of overnight visitor-trips by type of trip separately for each leading purpose**

leading purpose	package	non-package	all
	(2)	(3)	(4)
completed during last 365 days			
holidaying, leisure & recreation	60	940	1000
health & medical	7	993	1000
shopping	5	995	1000
<b>all (incl. n.r.)</b>	<b>26</b>	<b>974</b>	<b>1000</b>
completed during last 30 days			
business	4	996	1000
social	0	1000	1000
religious & pilgrimage	34	966	1000
education & training	38	962	1000
others	5	995	1000
<b>all</b>	<b>4</b>	<b>996</b>	<b>1000</b>

Ref: Table 30, Appendix A

A package trip (see Chapter Two, paragraph 2.1.14.1) consisted of a “tourism product” provided by a tour-operator which elaborates it and sells it directly or through travel agencies. Within a package trip, travellers received a combination of products associated with a trip, which were made of more than one of the following tourism services: Transportation services, accommodation services, food serving services, sightseeing services, entertainment services, etc. and other goods and services at will. The survey revealed only a marginal presence of package trips in domestic travel behaviours of Indian households in the context of overnight visitors. Statement 3.8 shows that only 6% out of overnight visitor-trips with leading purposes holidaying, leisure and recreation completed during last 365 days were package trips. For other purposes percentage of overnight visitor-trips is insignificant except for the purposes of religious &pilgrimage and education& training with less than 4%.

### **3.10 Distribution of overnight trips by reimbursement:**

Expenditure on a particular trip may be partially or fully reimbursed or directly paid by Government or by some other agency. Examples are LTC /LTA given in Government, private organisations, banks, insurance companies like LIC, GIC, and travelling fares and accommodation costs defrayed by organisers of seminars, conferences, etc. Statement 3.9 presents per 1000 distribution of overnight trips by reimbursement separately for each leading purpose. It shows that less than 5% of overnight trips are reimbursed except trips made for the purpose of business (12.7%) and education &training (6.8%).

<b>Statement 3.9: Per 1000 distribution of overnight trips by reimbursement separately for each leading purpose</b>			
leading purpose (1)	reimbursed (2)	not-reimbursed (3)	all (incl. n.r.) (4)
<b>completed during last 365 days</b>			
holidaying, leisure & recreation	22	978	1000
health & medical	45	954	1000
shopping	13	987	1000
<b>all (incl. n.r.)</b>	<b>37</b>	<b>962</b>	<b>1000</b>
<b>completed during last 30 days</b>			
business	127	867	1000
social	4	996	1000
religious & pilgrimage	10	989	1000
education & training	68	932	1000
others	39	961	1000
<b>all</b>	<b>8</b>	<b>991</b>	<b>1000</b>

Ref: Table 31, Appendix A

### **3.11 Visitor-trip:**

Certain features of trips, differ not only from trip to trip but, for the same trip, may vary from one participant to another – and therefore were recorded separately during the survey for each trip for each participant. These include mode of travel, place of stay, and even purpose of the

visitor (as distinct from leading purpose, which is fixed for a particular trip). These characteristics are termed visitor-trip characteristics as they may vary with each visitor-trip combination. For visitor trip, there may be two reference periods but visitor's purpose may be any of the eight purposes irrespective of the leading purpose of trip. Statement 3.10 describes the percentage distribution of overnight visitor-trips by visitor's purpose of trip with leading purposes holidaying, leisure and recreation, health & medical and shopping completed during last 365 days and with leading purposes business, social, religious & pilgrimage, education & training and others completed during last 30 days for different sectors. The statement reveals that a substantive part of visitor's purpose (28.6% for rural areas and 15.2% for urban areas) is different from leading purpose of the trip when trips were made with leading purposes holidaying, leisure and recreation, health & medical and shopping completed during last 365 days. However that divergence (0.7 % for rural areas and 0.9% for urban areas) is very low when the leading purpose is business, social, religious & pilgrimage, education & training and others for the trips completed during last 30 days.

Statement 3.10: Percentage distribution of overnight visitor-trips by purpose of trip for different sectors per person <sup>@</sup>				
visitor's purpose	percentage distribution of overnight visitor-trips			
	completed during last 365 days with leading purposes holidaying, leisure and recreation, health & medical and shopping		completed during last 30 days with leading purposes business, social, religious & pilgrimage, education & training and others

### 3.12 Visitor's purpose by Visitor's age:

Statement 3.11 presents proportion of overnight visitor trips among different visitor's purpose for all the overnight trips made by particular age group of visitors. It shows that with the increase in age of visitor proportion of overnight trips decreases for the visitor's purpose holidaying, leisure and recreation and to some extent religious & pilgrimage. However opposite is true for the visitor's purpose health & medical. It is also seen that overnight trips with visitor's purpose social, age of visitors does not matter for the trips completed during last 30 days.

**Statement 3.11: Percentage distribution of overnight visitor-trips by purpose of trip for different age-groups of the visitor**

Statement 3.12a presents proportion of overnight visitor-trips completed during last 365 days by purpose of trip for different educational levels of the visitor with leading purposes holidaying, leisure & recreation, health & medical, and shopping. It reveals a very interesting picture that with the increase in educational level of visitor, proportion of overnight visitor trips increases for the visitor's purpose holidaying, leisure and recreation. Statement 3.12b shows that more than 80% of overnight visitor trips made by visitors during last 30 days of any educational level are with the purpose social.

### 3.14 Mode of travel:

*Mode of travel* refers to means of transport used by visitor(s) to travel in a trip. Here travel means the travelling done to cover the distances to the destinations and not joyrides or movement for adventure, as in skiing or boating for pleasure, or walking inside a museum, fort or maze. One or more of the means of transport as shown in the statement 3.13a & 3.13b were possible in a trip. The means of transport by which maximum distance was travelled was treated as 'major' *mode of travel* for that trip. Statement 3.13a presents percentage distribution of overnight visitor-trips by major mode of travel for each visitor's purpose completed during last 365 days. It reveals that bus was the most availed mode of travel in rural areas with 50% share of the visitor-trips completed during last 365 days. In urban areas bus (34%) and train (31%) were almost equally used mode for travelling. Mode of travel was 'air' having UPR in urban areas for 3% of visitor-trips with purposes holidaying, leisure & recreation, but such cases are negligible for overnight visitor-trips having UPR in rural areas.

**Statement 3.13a: Percentage distribution of overnight visitor-trips by major mode of travel for each visitor's purpose completed during last 365 days with leading purposes holidaying, leisure & recreation, health & medical, and shopping**

visitor's purpose	major mode of travel

Similarly Statement 3.13b presents percentage distribution of overnight visitor-trips by major mode of travel for each visitor's purpose completed during last 30 days. It indicates that for the visitor-trips completed during last 30 days, bus was the dominant mode of travel (70% & 55% of visitor-trips in rural and urban areas respectively). In urban areas, 25% of visitor-trips availed train for their travelling where as such incidence was lowest among all means of transport except for air, which is nil for those having UPR in rural areas.

**Statement 3.13b: Percentage distribution of overnight visitor-trips by major mode of travel for each visitor's purpose completed during last 30 days with leading purposes business, social, religious & pilgrimage, education & training and others**

### 3.15 Type of Stay:

The *type of stay* refers to the accommodation used for stay by visitor(s) in an overnight trip. Accommodation refers to the space, whether paid or unpaid, where the visitor(s) spent some considerable time for spending night, taking rest, spending some leisure time, refreshing oneself, etc. during the trip. For a visitor on a trip, major type of stay means the accommodation where the visitor spent the greatest number of nights for overnight trips. Statement 3.14a presents percentage distribution of overnight visitor-trips by major type of stay for each visitor's purpose completed during last 365 days. Visitors from urban and rural areas exhibited different pattern of stay for overnight visitor-trips completed during last 365 days with leading purposes holidaying, leisure & recreation, health & medical, and shopping.

From statement 3.14a, it is observed that for 91% visitor-trips from rural area, visitors stayed with friends & relatives or in ‘other’ places which includes hospitals, nursing homes, carriages/coaches, ships, tents, railway station, waiting rooms etc. Taking into consideration all urban visitor’s purposes, it appears that place of stay during trips had skewed distribution over friends & relatives (36.2%), ‘other’ places (33.2%), hotel & guest house (25.8%) and rest.

**Statement 3.14a: Percentage distribution of overnight visitor-trips by major type of stay for each visitor’s purpose completed during last 365 days with leading purposes holidaying, leisure & recreation, health & medical, and shopping**

<sup>@</sup> includes rented house

Statement 3.14b reflects that friends and relatives are a prominent source of accommodation with respect to both the rural and urban visitor trips for trips completed during last 30 days. For around 90% and 86% of visitor-trips from rural and urban areas respectively, friends and relatives provided the stay during the trips. For visitor-trips with purpose pilgrimage & religious activities, dhramshala was the most preferred choice of stay, with 39% and 35% of visitor-trips for trips from rural and urban areas respectively, with leading purposes business, social, religious & pilgrimage education & training and others completed during last 30 days.

**Statement 3.14b: Percentage distribution of overnight visitor-trips by major type of stay for each visitor's purpose completed during last 30 days with leading purposes business, social, religious & pilgrimage, education & training and others**

### 3.16 Average trip duration:

Average duration of overnight visitor-trip is measured by the number of nights spent by the visitor outside his/her usual place of residence from the starting of the trip to the completion of the trip, including the nights spent in transit.

Statement 3.15 gives the average duration of overnight visitor-trips in terms of number of nights, separately for trips with visitor's purpose. On an average, the duration of a trip was 5.4 nights (i.e. 5 to 6 nights) for rural areas and 6.7 nights (i.e. 6 to 7 nights) for urban areas for those visitor-trips with leading purpose holidaying, leisure and recreation, health & medical and shopping completed during last 365 days. Similarly for those visitor-trips with leading purpose business, social, religious & pilgrimage, education & training and others completed during last 30 days, on an average, the duration of a trip was 2.9 nights (i.e. 2 to 3 nights) for rural areas and 3.7 nights (i.e. 3 to 4 nights) for urban areas.

The maximum average duration of overnight trips is seen as 7.6 (i.e. 7 to 8 nights) for the visitor's purpose social in urban areas, for those visitor-trips with leading purpose holidaying, leisure and recreation, health & medical and shopping completed during last 365 days. Similarly for those visitor-trips with leading purpose business, social, religious & pilgrimage, education & training and others completed during last 30 days, maximum average duration of

overnight trips is 7.3 nights (i.e. 7 to 8 nights) in rural areas & 4.3 nights (4 to 5 nights) in urban areas for visitor's purpose 'business' which exhibits maximum among all purposes.

**Statement 3.15: Average duration (no. of nights spent) of overnight visitor-trips by purpose of trip**

visitor's purpose	average duration (no. of nights spent) of overnight visitor-trips with leading purposes			
	holidaying, leisure and recreation, health & medical and shopping completed during last 365 days		business, social, religious & pilgrimage, education & training and others completed during last 30 days

Note: '-' indicates figures are not presented due to very small sample size (less than 50 at all-India level)

### 3.17 Main Destination:

Main destination is generally a place which is **central to the decision** to undertake the trip. However, during the survey if no such place can be identified by the informant, the main destination was taken as the place where the members **spent maximum night** during the trip. Statement 3.16 presents estimated number of visitor-trips for top 10 receiving states. It reveals that Maharashtra had the maximum number of visitor trips (1.51 crores) as destination place followed by Uttar Pradesh( 1.43 crores) out of those overnight visitor trips originated from all over the country which completed during last 365 days in their UPR with leading purposes holidaying, leisure and recreation, health & medical and shopping.

Similarly overnight trips completed during last 30 days with leading purposes business, social, religious & pilgrimage, education & training and others, Uttar Pradesh (1.60 crores) received maximum number of visitor trips followed by Andhra Pradesh & Telangana (1.30 crores).

**Statement 3.16: Estimated no. (00) of overnight visitor-trips for top 10 States of main destination (combining visitors from within State and from outside State)  
rural + urban**

completed during last 365 days with leading purposes holidaying, leisure and recreation, health & medical and shopping		completed during last 30 days with leading purposes business, social, religious & pilgrimage, education & training and others

### 3.18 Visitor generation:

**Statement 3.17: Estimated no. (00) of overnight visitor-trips for top 10 States of origin**

completed during last 365 days with leading purposes holidaying, leisure and recreation, health & medical and shopping		completed during last 30 days with leading purposes business, social, religious & pilgrimage, education & training and others	
State of origin	no. of overnight visitor-trip	State of origin	no. of overnight visitor-trip
(1)	(2)	(3)	(4)
Maharashtra	159293	Uttar Pradesh	162703
Uttar Pradesh	143840	Andhra Pradesh & Telangana <sup>#</sup>	126224
West Bengal	92260	Maharashtra	106728
Tamil Nadu	87660	West Bengal	97062
Bihar	76612	Tamil Nadu	88497
Andhra Pradesh & Telangana <sup>#</sup>	73739	Bihar	83230
Odisha	71758	Karnataka	79912
Kerala	64925	Rajasthan	78578
Rajasthan	63959	Madhya Pradesh	76784
Madhya Pradesh	63493	Kerala	54018

Ref: Table 12A & 12B , Appendix A

<sup>#</sup> This includes the State of Andhra Pradesh & Telangana, as the state Telangana was created after finalization of schedule designing. No provision was there in the schedule to capture the information with separate State code where main destination state is Telangana.

Statement 3.17 reveals estimated no of visitor-trips for top 10 generating states. It reveals that Maharashtra (1.60 crores) generated maximum number of visitor trips followed by Uttar Pradesh (1.44 crores) out of all overnight visitor trips generated from all over the country which completed during last 365 days with leading purposes holidaying, leisure and recreation, health & medical and shopping. Similarly overnight visitor trips completed during last 30 days with leading purposes business, social, religious & pilgrimage, education & training and others, Uttar Pradesh (1.63 crores) generated maximum number of visitor trips followed by Andhra Pradesh & Telangana (1.26 crores) .

### **3.19 An overview of origin and destination of trips:**

Statement 3.16 &3.17 reveal that Maharashtra & Uttar Pradesh are the states having the same order as maximum and next to maximum in respect of number of overnight visitor trips both as receiving and generating states for trips completed during last 365 days. Similarly, for trips completed during last 30 days Uttar Pradesh & Andhra Pradesh (before partition) exhibits the above feature as receiving & generating states. It means that maximum number of trips originated from these states & these were confined within the geographical boundary of each of these states. In other words, number of trips for visitors from outside these states as well as number of visitors from these states to other states is relatively less.

### **3.20 Extent of same-day Tourism activity:**

A domestic same-day trip is one that does not involve an overnight stay (i.e. duration of more than 12 hrs and incl. 12 midnight to 5 A.M.) but movement of one or more household members outside their usual environment (which includes the usual place of residence (UPR)) and return to the same UPR (a round trip), irrespective of place of stay during these hours. Same-day trip can be either completed on a same calendar date or spread over two consecutive calendar dates with a main destination within the country of residence of the visitor, for any of the following purposes:

- Business
- Holidaying, leisure & recreation
- Social
- Pilgrimage & Religious
- Education and Training
- Health and Medical
- Shopping
- Others

The extent of tourism activity in the context of same-day trip can be measured by percentage of households reporting at least one same-day trip during last 30 days. Statement 3.18 presents the state wise percentage of households reporting at least one same-day trip during the last 30 days for both rural and urban India. It is observed that overall in all-India level 51.7% households

had reported at least one same-day trip during last 30 days. However in rural areas 57.1% households and 40.6% households in urban areas had made at least one same-day trip during last 30 days.

**Statement 3.18: Percentage of households reporting at least one same-day trip during last 30 days for each State/UT**

State (1)	rural (2)	urban (3)	rural + urban (4)
Andhra Pradesh	63.9	44.8	57.7
Arunachal Pradesh	32.8	22.6	30.7
Assam	57.6	56.3	57.4
Bihar	44.5	33.0	43.3

<b>all-India</b>	<b>57.1</b>	<b>40.6</b>	<b>51.7</b>

Ref: Table 1 & 29, Appendix A

### 3.21 Intensity of same-day Tourism activity:

The intensity of tourism activity in the context of same-day trip has been presented in the statement 3.19. This is measured by the number of same-day trips generated per 100 households those have made at least one same-day trip during the reference period (tourist household). Statement 3.20 shows that 1.63 same-day trips on an average (i.e. 1 to 2 trips) were generated per tourist household.

<b>Statement 3.19: Average number of same-day trips completed during last 30 days per 100 tourist households for different leading purpose</b>			
leading purpose	rural	urban	rural + urban
(1)	(2)	(3)	(4)
business	7	10	8
holidaying, leisure & recreation	2	5	3
social	58	72	61
religious & pilgrimage	8	14	10
education & training	2	2	2
health & medical	26	17	24
shopping	59	21	49
others	7	4	6
<b>all</b>	<b>169</b>	<b>146</b>	<b>163</b>

Ref: Table 25&29, Appendix A

### 3.22 Same-day trips by leading purpose

Percentage distribution of same-day trip by leading purpose completed during last 30 days has been presented in the statement 3.20. It is seen that Shopping (35%) and social (34%) were the two most frequent same-day trips undertaken by the rural households, whereas, in urban areas nearly half of such trips were for social purposes.

<b>Statement 3.20: Percentage distribution of same-day trips by leading purpose completed during last 30 days</b>			
leading purpose	rural	urban	rural + urban
(1)	(2)	(3)	(4)

# Chapter Four

## Domestic Tourism Expenditure

### 4.1 General

This chapter deals with expenditure incurred in connection with overnight and same-day trips. As explained in Chapter two, tourism expenditure includes expenditure made not just during the trip but also the expenditure related to the trip even if made before or after the trip. It included all expenses related to the trip paid or payable by the household. It also included expenditure related to the trip, whether directly paid or reimbursed, by some institution like Government or other agencies on behalf of the selected household. All expenditure in connection with the trip except those used for productive purposes/enterprises was included. Estimates were generated to obtain average expenditure per trip by sector and State/UT of the reporting households, as well as separately for each leading purpose; only all-India estimates for a one-year period are discussed here. The break-up of overnight and same-day trip expenditure over broad expenditure heads is also examined. It is further investigated how the expenditure pattern varies with the leading purpose of an overnight/a same day trip. The state wise RSEs are presented at the end of this chapter.

### 4.2 Expenditure on overnight trips

Statement 4.1 shows the item wise average expenditure (in ₹) per overnight trip in respect of different leading purposes for rural and urban areas combined. Health & medical trips were the costliest overnight trips with average expenditure per trip of ₹15336 followed by trips with leading purpose shopping. Social trips were the least expensive trips (average trip cost ₹1068). Average expenditure on package component for overnight trips was not very prominent except for leading purpose holidaying, leisure & recreation (₹1095).

Statement 4.1: Average expenditure (in ₹) per overnight trip by categories of expenditure for each leading purpose rural + urban									
leading purpose	package component	non-package component							total
		accommodation	food and drink	transport	shopping	recreation, religious, etc.	medical	others	
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
<b>completed during last 365 days</b>									
holidaying, leisure & recreation	1095	843	951	2029	1130	141	61	108	6358
health & medical	305	644	876	787	235	3	12281	206	15336
shopping	68	477	563	905	11621	25	47	195	13902
<b>completed during last 30 days</b>									
business	70	1020	905	1389	910	11	70	80	4455
social	2	12	143	340	483	9	21	58	1068
pilgrimage & religious activities	212	280	508	938	500	196	15	68	2717
education & training	249	314	441	659	410	14	113	87	2286
others	49	188	381	441	424	13	1296	84	2875

Ref. Table 20, Appendix A

### 4.3 Item-wise share of overnight trip expenditure

4.3.1 Tourism expenditure has usually two components- one package component and other non-package component. Non-Package component includes accommodation, food, transport, shopping, recreation, religious, cultural, sporting and health related activities and others.

4.3.2 Statement 4.2 gives item wise share of overnight trip expenditure separately for rural and urban areas for trips completed during (a) last 365days with leading purposes holiday, leisure, health& medical and shopping and (b) last 30 days with leading purposes business, social, religious and pilgrimage, education & training and others .

This statement shows that there is variation in expenditure over different items related to domestic tourism.

For overnight trip expenditure, contribution of Package component is low compared to that of non-package component – 1to 2% for rural sector whereas less than 9 % for urban.

Further, it is observed that for trips undertaken during last 365 days with leading purposes holidaying, medical etc for both the sectors, share of expenditure on medical items was quiet high( rural- 74.8% and urban- 50.5%) with respect to other items.

For trips undertaken during last 30 days with leading purposes business, social, religious etc for both the sectors, expenditure on transport and shopping items was very high (more than 65%).

**Statement 4.2: Item-wise share (in %) of trip expenditure for overnight trips**

items of expenditure	completed during last 365 days for leading purposes holidaying, leisure and recreation; health & medical and shopping		completed during last 30 days for leading purposes business; social; religious and pilgrimage; education & training and others	
	rural	urban	rural	urban
(1)	(2)	(3)	(4)	(5)
package	2.1	8.7	1	2.8
accommodation	4.3	8	3.3	6.5
food	6.7	8.2	15	14.8
transport	6.5	15.1	26.3	36.8
shopping	3.7	7.7	42.2	30.8
recreation etc.	0.2	0.8	1.9	1.7
medical	74.8	50.5	5.4	2.5
others	1.7	1	4.9	4.1
<b>total</b>	<b>100</b>	<b>100</b>	<b>100</b>	<b>100</b>

Ref: Table 21A & 21B, Appendix

4.3.3 Statement 4.3a and 4.3b provide the item wise contribution of non-package component in overnight trip expenditure separately for rural and urban areas for overnight trips completed during last 365 days and last 30 days respectively. As the major part for overnight trip

expenditure was contributed by non package components, so it is worthwhile to see how items of expenditure of non-package component contribute in trip expenditure on non-package component. Expectedly, the share of expenditure on medical items for health & medical trips and on shopping items for shopping trips were very high (more than 80%). For all other trips, there was no such single item with that much high share. However, there are differences in the item-wise share of expenditure specially for leading purpose holidaying between trips undertaken by the households from rural and urban areas but not much variation for other leading purposes.

**Statement 4.3a: Item-wise share (in %) of trip expenditure on non-package component for overnight trips completed during last 365 days for leading purposes holiday, leisure and recreation; health & medical and shopping**

items of expenditure of non-package component	leading purpose					
	holidaying, leisure and recreation		health & medical		shopping

others	2522	1349	1793	2211	6617	3154
all	1161	1315	1601	1801	3326	2008

Ref: Table 22, Appendix A

Statement 4.4R and 4.4U describe the average expenditure per overnight trip by leading purposes and quintile classes of UMPCE. It is observed that, more or less, the households belonging to the higher quintile classes of UMPCE spent more on overnight trips irrespective of the leading purpose of trip in both rural and urban areas. Pattern of spending on trips markedly differ in urban areas compared to their rural counterparts. In general, the average trip expenditure incurred by households in urban areas was around twice compared to those in rural areas for the overnight trips completed during last 30 days. For trips with leading purpose holidaying, leisure & recreation, for which this was more than 3 times.

Only exception was ‘others’ where average expenditure did not vary much between rural and urban areas.

**4.5 Expenditure on overnight trip by leading purposes:** The following Statement 4.5 provides the estimates of average expenditure (in ₹) per overnight with respect to different leading purposes. It may be observed that for rural household it is health & medical trips upon which maximum expenditure (₹13654) is incurred while for urban household, it is shopping trips (₹22989) among all the trips completed during last 365 days. For the trips completed during last 30days, it is business trip upon which both the rural and urban households spend most (rural- ₹2809 and urban- ₹6464).

Statement 4.5: Average expenditure(in ₹ ) per overnight trips for each leading purpose		
leading purpose (1)	rural (2)	urban (3)
<b>completed during last 365 days</b>		
holidaying, leisure & recreation	2827	9219
health & medical	13654	21437
shopping	9689	22989
<b>all</b>	<b>11155</b>	<b>14534</b>
<b>completed during last 30 days</b>		
business	2809	6464
social	840	1586
religious & pilgrimage	2122	3715
education & training	1707	3165
others	2743	3154
<b>all</b>	<b>1028</b>	<b>2008</b>

Ref: Table 20 & 21, Appendix A

## 4.6 Expenditure on same-day trips

4.6.1 A domestic same-day trip is one that does not involve an overnight stay (i.e. duration of more than 12 hrs including 12 midnight to 5 A.M.) but fulfil other conditions of overnight trips, irrespective of the number of hours spent on the trip.

4.6.2 Statement 4.6 provides average expenditure per same-day trip, incurred by the households in rural and urban areas, completed during last 30 days. No marked difference in average expenditure was observed between same-day trips from rural and urban areas, except for trips with leading purposes holidaying and shopping, where average expenditure for urban areas were nearly double the corresponding expenditure in rural areas.

<b>Statement 4.6: Average expenditure (in ₹) per same-day trip completed during last 30 days for each leading purpose</b>			
leading purpose	sector		
	rural	urban	rural + urban
(1)	(2)	(3)	(4)
business	666	773	701
holidaying, leisure and recreation	534	909	697
social	283	498	349
pilgrimage & religious activities	389	633	482
education & training	288	415	324
health & medical	699	868	730
shopping	873	1808	977
others	232	263	238
<b>all</b>	<b>576</b>	<b>767</b>	<b>620</b>

Ref: Table 25, Appendix A

#### 4.7 Item-wise share of same-day trip expenditure

Statement 4.7 provide the item wise contribution of same day trip expenditure separately for rural and urban areas for same day trips competed during last 30 days. For the same day trips undertaken by rural households, shopping constitute nearly 60% of total expenditure whereas for urban households making same day trips, shopping contribute nearly 50% of total expenditure. No remarkable differences in the item-wise share of expenditure were observed between trips undertaken by the households from rural and urban areas.

<b>Statement 4.7: Item-wise share (in %) of trip expenditure for same-day trips completed during last 30 days</b>		
items of expenditure	sector	
	rural	urban
(1)	(2)	(3)
Package component	0.2	0.5

# Appendix B

**Sample Design and Estimation Procedure**

# Note on Sample Design and Estimation Procedure

---

## 1. Introduction

**1.1 Subject Coverage:** The 72<sup>nd</sup> round (July 2014 – June 2015) of NSS was devoted to the subject of Social Consumption and earmarked for surveys on ‘Domestic Tourism Expenditure’, ‘Household Expenditure on Services and Durable Goods’, ‘Household Consumer Expenditure’, ‘Household Consumer Expenditure with details of Food Consumption’ and ‘Household Consumer Expenditure with details of Non-Food Consumption’.

## 2. Outline of Survey Programme

**2.1 Geographical coverage:** The survey covered the whole of the Indian Union.

**2.2 Period of survey and work programme:** The period of survey was of one year duration starting on 1<sup>st</sup> July 2014 and ending on 30<sup>th</sup> June 2015.

**2.3 Sub-rounds:** The survey period of this round was divided into four sub-rounds of three months' duration each as follows:

sub-round 1 :	July - September 2014
sub-round 2 :	October - December 2014
sub-round 3 :	January - March 2015
sub-round 4 :	April - June 2015

In each of these four sub-rounds equal number of sample villages/blocks (FSUs) was allotted for survey with a view to ensure uniform spread of sample FSUs over the entire survey period. Attempt was made to survey each of the FSUs during the sub-round to which it was allotted. *Because of the arduous field conditions, this restriction was not strictly enforced in Andaman and Nicobar Islands, Lakshadweep, Leh (Ladakh) and Kargil districts of Jammu & Kashmir and rural areas of Arunachal Pradesh and Nagaland.*

**2.4 Schedules of enquiry:** During this round, the following schedules of enquiry were canvassed:

- Schedule 0.0 : List of Households
- Schedule 1.60 : Household Consumer Expenditure
- Schedule 1.61 : Household Consumer Expenditure with details of Food Consumption
- Schedule 1.62 : Household Consumer Expenditure with details of Non-Food Consumption
- Schedule 21.1 : Domestic Tourism Expenditure
- Schedule 1.5 : Household Expenditure on Services and Durable Goods

**2.5 Participation of States:** In this round all the States and Union Territories except Andaman & Nicobar Islands, Chandigarh, Dadra & Nagar Haveli and Lakshadweep participated. The following is the matching pattern of the participating States/UTs.

State/UT	Extent of matching
Nagaland (U)	triple
Andhra Pradesh, Jammu & Kashmir , Manipur, Delhi, Odisha, Telangana	double
Maharashtra (U)	one and half
Remaining States/ UTs	equal

### 3. Sample Design

**3.1 Outline of sample design:** A stratified multi-stage design was adopted for the 72<sup>nd</sup> round survey. The first stage units (FSU) were the Census villages (Panchayat wards for Kerala) in the rural sector and Urban Frame Survey (UFS) blocks in the urban sector. The ultimate stage units (USU) were households in both the sectors. In the case of large FSUs, one intermediate stage of sampling was the selection of two hamlet-groups (hgs)/ sub-blocks (sbs) from each rural/ urban FSU.

**3.2 Sampling Frame for First Stage Units:** For the rural sector, the list of 2011 Population Census villages constituted the sampling frame. However, for Kerala, the latest available updated list of Panchayat wards was the sampling frame. For the urban sector, the list of UFS blocks (2007-12) was considered as the sampling frame.

#### 3.3 Stratification:

- (a) Stratum was formed at district level. Within each district of a State/UT, generally speaking, two basic strata were formed: (i) rural stratum comprising of all rural areas of the district and (ii) urban stratum comprising of all the urban areas of the district. However, within the urban areas of a district, if there were one or more towns with population 4 lakhs or more as per Census 2011, each of them formed a separate basic stratum and the remaining urban areas of the district were considered as another basic stratum.
- (b) A special stratum in the rural sector only was formed at State/UT level before district-strata were formed in each of the States/UTs. This stratum comprised all the villages of the State/UT with population less than 150 as per Census 2011. However, this special stratum was formed if at least 50 such villages were available in a State/UT.
- (c) In case of rural sectors of Nagaland another special stratum was formed within the State consisting of all the villages which were difficult to access.

#### 3.4 Sub-stratification:

**3.4.1 Rural sector:** If 'r' was the sample size allocated for a rural stratum, ' $r/4$ ' sub-strata were formed in that stratum. The villages within a stratum (district) as per frame were first arranged in ascending order of population. Then sub-strata 1 to ' $r/4$ ' were demarcated in such

a way that each sub-stratum comprised of a group of villages of the arranged frame and had more or less equal population.

**3.4.2 Urban sector:** Each urban stratum was divided into two parts – ‘Affluent part’ consisting of UFS blocks identified as ‘Affluent Area’ and ‘Non-Affluent part’ consisting of the remaining UFS blocks within the stratum. Sample allocation of a stratum was then allocated to Affluent and Non-Affluent parts in proportion to total number of households in the UFS blocks with double weightage to Affluent part subject to a maximum of 8 FSUs in ‘Affluent part’ of any stratum. Let ‘ $u$ ’ was the sample size allocated for an urban stratum consisting of both affluent area UFS Blocks and non affluent area UFS Blocks. ‘ $u/4$ ’ sub-strata were formed within each stratum. Out of these ‘ $u/4$ ’ sub-strata, the first two sub-strata ‘01’ and ‘02’ were earmarked for those UFS blocks which were identified as ‘Affluent Area’ and the remaining sub-strata, ‘03’, ‘04’,..... and so on, were assigned to the non-affluent UFS blocks. If any stratum did not have any Affluent Area UFS block then also the sub-stratum number was started from ‘03’ for that stratum. For all strata, if  $u/4 > 1$ , implying formation of 2 or more sub-strata, all the UFS blocks within the stratum were first arranged in ascending order of total number of households in the UFS Blocks as per UFS phase 2007-12. Then sub-strata 1 to ‘ $u/4$ ’ were demarcated in such a way that each sub-stratum had more or less equal number of households. This procedure was done separately for Affluent-part and Non-Affluent part of the stratum (if two sub-strata are required to be formed in the Affluent part).

The following three types of cases were found while doing the sub-stratification:

- i) If there was no ‘Affluent Area’ UFS block in the stratum, all the UFS blocks were divided into ‘ $u/4$ ’ sub-strata and numbered as ‘03’, ‘04’, ....., ‘ $(u/4)+2$ ’.
- ii) If only one sub-stratum was formed with the ‘Affluent Area’ UFS blocks, then all the remaining non-affluent blocks were divided into ‘ $(u-4)/4$ ’ sub-strata and numbered as ‘03’, ‘04’, ‘ $(u/4)+1$ ’.
- iii) If two sub-strata were formed with the ‘Affluent Area’ blocks, then all the remaining non-affluent UFS blocks were divided into ‘ $(u-8)/4$ ’ sub-strata and numbered as ‘03’, ‘04’, ....., ‘ $u/4$ ’.

**3.5 Total sample size (FSUs):** 14092 FSUs were allocated for the central sample at all-India level.

**3.6 Allocation of total sample to States and UTs:** The total number of FSUs allotted in the central sample were allocated to the States and UTs in proportion to population as per *Census 2011* subject to a minimum sample allocation to each State/ UT.

**3.7 Allocation of State/ UT level sample to rural and urban sectors:** State/UT level allocation was allocated between two sectors in proportion to population as per *Census 2011* with double weightage to urban sector in general. A minimum of 16 FSUs (minimum 8 each for rural and urban sector separately) was allocated to each State/UT.

**3.8 Allocation to strata:** Within each sector of a State/ UT, the respective sample size was allocated to the different strata in proportion to the population as per Census 2011. Stratum level allocation was adjusted to multiples of 4 with a minimum sample size of 4.

For special stratum formed in rural areas of Nagaland as discussed in para 3.3 (c), 12 FSUs were allocated.

**3.9 Allocation to sub-strata:** In both rural and urban sectors, 4 FSUs were allocated for each sub-stratum in general.

### 3.10 Selection of FSUs:

For the rural sector, from each stratum/sub-stratum, required number of sample villages was selected by Probability Proportional to Size With Replacement (PPSWR), size being the population of the village as per Census 2011.

For the urban sector, from each stratum/sub-stratum, FSUs were selected by Probability Proportional to Size With Replacement (PPSWR), size being the number of households of the UFS Blocks.

Both rural and urban samples were drawn in the form of two independent sub-samples and equal number of samples was allocated among the four sub rounds.

### 3.11 Selection of hamlet-groups/ sub-blocks - important steps

**3.11.1 Criterion for hamlet-group/ sub-block formation:** After identification of the boundaries of the FSU, it was determined whether listing will be done in the whole sample FSU or not. In case the approximate present population of the selected FSU was found to be 1200 or more, it was divided into a suitable number (say, D) of 'hamlet-groups' in the rural sector and 'sub-blocks' in the urban sector by more or less equalising the population as stated below.

approximate present population of the sample FSU	no. of hg's/sb's to be formed
less than 1200 (no hamlet-groups/sub-blocks)	1
1200 to 1799	3
1800 to 2399	4
2400 to 2999	5
3000 to 3599	6
.....and so on	-

For rural areas of Himachal Pradesh, Sikkim, Uttarakhand (except four districts Dehradun, Nainital, Hardwar and Udham Singh Nagar), Poonch, Rajouri, Udhampur, Reasi, Doda, Kishtwar, Ramban, Leh (Ladakh), Kargil districts of Jammu and Kashmir and Idukki district of Kerala, the number of hamlet-groups were formed as follows:

approximate present population of the sample village	no. of hg's to be formed
less than 600 (no hamlet-groups)	1
600 to 899	3
900 to 1199	4
1200 to 1499	5
1500 to 1799	6
.....and so on	-

**3.11.2 Formation and selection of hamlet-groups/ sub-blocks:** In case hamlet-groups/ sub-blocks were formed in the sample FSU, the same was done by more or less equalizing population. Note that while doing so, it was ensured that the hamlet-groups/ sub-blocks formed were clearly identifiable in terms of physical landmarks.

Two hamlet-groups (hg)/ sub-blocks (sb) were selected from a large FSU wherever hamlet-groups/ sub-blocks were formed in the following manner – one hg/ sb with maximum percentage share of population was always selected and termed as hg/ sb1; one more hg/ sb was selected from the remaining hg's/ sb's by simple random sampling (SRS) and termed as hg/ sb2. Listing and selection of the households was done independently in the two selected hamlet-groups/ sub-blocks. The FSUs without hg/ sb formation was treated as sample hg/ sb number 1.

### 3.12 Formation of second stage strata and allocation of households:

3.12.1 A cut-off point 'A' (in  $\square$ ) was determined from NSS 68<sup>th</sup> round data for urban areas of **each NSS region** in such a way that top 40% of the population have Monthly Per Capita Expenditure (MPCE) more than 'A'.

The following was the plan of second stage stratification for Schedule 21.1.

SSS	composition of SSS	number of households surveyed	
		FSU without hg/sb formation	FSU with hg/sb formation (for each hg/sb)
<b>rural</b>			
1	households having at least one member who performed overnight trip during last 365 days for medical/ holidaying/ shopping purpose	with strong dwelling structure	2 1
2		without strong dwelling structure	2 1
3	from the remaining, households having at least one member who performed any other overnight trip during last 30 days	with strong dwelling structure	2 1
4		without strong dwelling structure	2 1
5	other households		2 1
<b>urban</b>			
1	households having at least one member who performed overnight trip during last 365 days for medical/ holidaying/ shopping purpose	with MPCE > A	2 1
2		with MPCE $\leq$ A	2 1
3	from the remaining, households having at least one member who performed any other overnight trip during last 30 days	with MPCE > A	2 1
4		with MPCE $\leq$ A	2 1
5	other households		2 1

**3.13 Selection of households:** From each SSS the sample households for each of the schedules were selected by SRSWOR. Only one schedule was canvassed in any household. So, under no circumstances, any household was selected for more than one schedule. It is to be mentioned here that Sch. 21.1 (Domestic Tourism Expenditure) was canvassed from the remaining schedules of listed households after selection of sample households for schedules 1.60, 1.61 and 1.62,

#### 4. Estimation Procedure

##### 4.1 Notations:

s = subscript for s-th stratum

t = subscript for t-th sub-stratum

m = subscript for sub-sample ( $m = 1, 2$ )

i = subscript for i-th FSU [village (panchayat ward)/ block]

d = subscript for a hamlet-group/ sub-block ( $d = 1, 2$ )

j = subscript for j-th second stage stratum in an FSU/ hg/sb

k = subscript for k-th sample household under a particular second stage stratum within an FSU/ hg/sb

D = total number of hg's/ sb's formed in the sample FSU

$D^* = 0$  if  $D = 1$

=  $(D - 1)$  for FSUs with  $D > 1$

Z = total size of a rural/urban sub-stratum (= sum of sizes of all villages/blocks of a sub-stratum)

z = size of sample village/UFS block used for selection.

n = number of sample FSUs surveyed including ‘uninhabited’ and ‘zero cases’ but excluding casualty for a particular sub-sample and sub-stratum.

H = total number of households listed in a second-stage stratum of an FSU / hamlet-group or sub-block of sample FSU

h = number of households surveyed in a second-stage stratum of an FSU / hamlet-group or sub-block of sample FSU

x, y = observed value of characteristics  $x, y$  under estimation

$\hat{X}, \hat{Y}$  = estimate of population total X, Y for the characteristics  $x, y$

Under the above symbols,

$y_{stmidjk}$  = observed value of the characteristic y for the k-th household in the j-th second stage stratum of the d-th hg/ sb ( $d = 1, 2$ ) of the i-th FSU belonging to the m-th sub-sample for the t-th sub-stratum of s-th stratum.

However, for ease of understanding, a few symbols have been suppressed in following paragraphs where they are obvious.

## 4.2 Formulae for Estimation of Aggregates for a particular sub-sample and stratum × sub-stratum:

### 4.2.1 Schedule 21.1

#### 4.2.1.1 Rural/ Urban:

(i) For j-th second-stage stratum of a stratum × sub-stratum:

$$\hat{Y}_j = \frac{\mathbf{Z}}{\mathbf{n}_j} \sum_{i=1}^{\mathbf{n}_j} \frac{1}{z_i} \left[ \frac{\mathbf{H}_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + \mathbf{D}_i^* \times \frac{\mathbf{H}_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]$$

(ii) For all second-stage strata combined:

$$\hat{Y} = \sum_j \hat{Y}_j$$

### 4.3 Overall Estimate for Aggregates for a sub-stratum:

Overall estimate for aggregates for a sub-stratum ( $\hat{Y}_{st}$ ) based on two sub-samples in a sub-stratum is obtained as:

$$\hat{Y}_{st} = \frac{1}{2} \sum_{m=1}^2 \hat{Y}_{stm}$$

### 4.4 Overall Estimate for Aggregates for a stratum:

Overall estimate for a stratum ( $\hat{Y}_s$ ) will be obtained as

$$\hat{Y}_s = \sum_t \hat{Y}_{st}$$

### 4.5 Overall Estimate of Aggregates at State/UT/all-India level:

The overall estimate  $\hat{Y}$  at the State/ UT/ all-India level is obtained by summing the stratum estimates  $\hat{Y}_s$  over all strata belonging to the State/ UT/ all-India.

### 4.6 Estimates of Ratios:

Let  $\hat{Y}$  and  $\hat{X}$  be the overall estimates of the aggregates Y and X for two characteristics  $y$  and  $x$  respectively at the State/ UT/ all-India level.

Then the combined ratio estimate ( $\hat{R}$ ) of the ratio ( $R = \frac{Y}{X}$ ) will be obtained as  $\hat{R} = \frac{\hat{Y}}{\hat{X}}$ .

**4.7 Estimates of Error:** The estimated variances of the above estimates will be as follows:

**4.7.1 For aggregate  $\hat{Y}$ :**

$$\hat{V}ar(\hat{Y}) = \sum_s \hat{V}ar(\hat{Y}_s) = \sum_s \sum_t \hat{V}ar(\hat{Y}_{st}) \text{ where } \hat{V}ar(\hat{Y}_{st}) \text{ is given}$$

by

$\hat{V}ar(\hat{Y}_{st}) = \frac{1}{4} (\hat{Y}_{st1} - \hat{Y}_{st2})^2$ , where  $\hat{Y}_{st1}$  and  $\hat{Y}_{st2}$  are the estimates for sub-sample 1 and sub-sample 2 respectively for stratum 's' and sub-stratum 't'.

**4.7.2 For ratio  $\hat{R}$ :**

$$MSE(\hat{R}) = \frac{1}{4\hat{X}^2} \sum_s \sum_t \left[ (\hat{Y}_{st1} - \hat{Y}_{st2})^2 + \hat{R}^2 (\hat{X}_{st1} - \hat{X}_{st2})^2 - 2\hat{R}(\hat{Y}_{st1} - \hat{Y}_{st2})(\hat{X}_{st1} - \hat{X}_{st2}) \right]$$

**4.7.3 Estimates of Relative Standard Error (RSE):**

$$RSE(\hat{Y}) = \frac{\sqrt{V\hat{a}r(\hat{Y})}}{\hat{Y}} \times 100$$

$$RSE(\hat{R}) = \frac{\sqrt{MSE(\hat{R})}}{\hat{R}} \times 100$$

**5. Multipliers:**

The formulae for multipliers at stratum/sub-stratum/second-stage stratum level for a sub-sample for schedule 21.1 are given below:

sch type	sector	formula for multipliers	
		hg / sb 1	hg / sb 2
21.1	rural/urban	$\frac{Z_{st}}{n_{stmj}} \times \frac{1}{z_{stmi}} \times \frac{H_{stmi1j}}{h_{stmi1j}}$	$\frac{Z_{st}}{n_{stmj}} \times \frac{1}{z_{stmi}} \times D_{stmi}^* \times \frac{H_{stmi2j}}{h_{stmi2j}}$
j = 1, 2, 3, 4, 5 for Sch. 21.1			

**Note:**

- (i) For estimating any characteristic for any domain not specifically considered in sample design, indicator variable may be used.
- (ii) Multipliers have to be computed on the basis of information available in the listing schedule irrespective of any misclassification observed between the listing schedule and detailed enquiry schedule.
